Thread: [Struggling with affiliate marketing](#)

dbates20 - January 3, 2019, 5:35 pm

Hello ladies and gents.

Today I want to talk about my struggle with affiliate marketing and get some help.

So I started an email marketing campaign and am struggling greatly even after taking 3 courses! (CBU,BLB and IM currently on market hero) So far I love market hero and love the software it comes with and the format.

BUT. I am having such a hard time getting traffic anywhere. I have made multiple youtube videos, Made a facebook page and shared a few posts to groups and my account disabled. So I then tried facebook ads and then my very first Facebook ad got disproved (idk why) so I tried changing some things in it(by no means was it scammy or anything) and then tried to republish it and then my ads account got disabled. Now I have even tried directly interacting with many people on Instagram too and didn't have much luck with that. I even tried answering questions on Quora and I was actually being helpful and answering their questions and then I get a notice from quora saying that I'm not sharing valuable information and the links I'm sharing aren't good. These weren't even my links these were links to articles I was sharing that would help people.

I'm 19 years old I just wanna make a couple hundred a month to help get me through college and other expenses without taking out a huge loan ill pay for the rest of my life.

Please help. I have spent too much money on this to not see a single result. I'm unsure what I'm doing wrong. Feel like I have been scammed left and right.

(I have put damn near 180 hours worth of work into this stuff so far)

I don't understand what you are trying to do.

Are you trying to market a product using email marketing?

Are you trying to offer your email marketing services to people?

theblackbook - February 28, 2019, 12:47 am

What are your email flows?

Have you segmented your audiences?

I am confused what are you trying to sell
