Thread: [can any phone be unlocked?](#)

mrhack - January 4, 2019, 6:17 pm

I plan on selling my old phones as unlocked if I could figure out how to...any advice or help?

?torm - January 4, 2019, 6:50 pm

Depends on the phone. What kind of phone are you trying to unlock? There are plenty of videos and tutorials out there. If you have an iPhone try contacting Apple or your carrier and I'm sure with some verification they can help you unlock your phone.

buffer008 - April 20, 2019, 1:35 am

In theory

Any phone can be unlocked

It depends on whether you are willing to give the money

cnminus - April 20, 2019, 8:52 am

You'll have to be more specific on the type of phones. But yes, most are able to.

mrhack - May 10, 2019, 3:45 pm

I want to do it my self so I won't have to pay the money. Is it a tool that I need to buy then? Does it require physically going into the phone and twist something?

For a price, yes, of course.

mrhack - May 10, 2019, 3:48 pm

well what tools do I need? are they like precision screw drivers?

Omniscient - May 20, 2019, 12:10 pm

Yes, you can unlock any smart-phone. Usually it's just a matter of obtaining the correct code to do it.

There are websites which sell unlocks to your phone for only a few bucks. I've used them and they do work. That's if you can't figure out how to do it for free.
