Thread: [Getting phone number from snapchat \(& other souces\)](#)

I am trying to get this kids number. I know them irl but I can't ask them for their number or it ruins the point. I have their fathers name, mothers name, both of their phone numbers, where they live, their jobs, their grandmother, their grandmothers facebook, and finally the targets pinterest.

How would I go about getting their phone number with what I already have, I have a lot at this point but I don't know how I would go about getting a kids phone number because I looked up the dad and mothers phone numbers to see if it was under their name and the father's name is in the landline and the mother's phone is in a differnet phone, but I assume it is hers, possibly not though.

Sorry man, I don't really want to give out their private info because I actually know them (and we are friends)... I just wanted their phone number without asking for it.

My advice is to stop pretending you're some incredible doxer.

If they're your friend then you should have no problem asking for their number.

It would seem that they aren't really your friend and you're just cyberstalking.

Never claimed I was a "incredible doxer". I am here and I won't deny that I am not the best at it but hey, I can at least try to get better...

dont be an asshole you nerd. If you have nothing else to bring up to the conversation, besides being an asshole, you should stay quiet.
