Follow Guidelines And Save Yourself From Getting Scammed

Well now E-book section is also not safe from scams and frauds.

In recent two months i have seen many scams and frauds, someone sells ripped E-books and get away with it.

Follow guidelines that i stating and i am sure this will decrease chance of getting scammed by 99percent.

Never Ever Trust Ubers And Leets Reviews

When i joined HF i thought Leets and Ubers are trusted and all and for reviews and all i also thought that they are trusted members, but that's 200 hundred percent fake guys.

I also started reviewing E-books Un-Officially but after recent incident i stopped doing this.

What happened is one guy was selling a E-book and he said 3 ubers or so can have review copy. I observed that other Ubers just rated the E-book 5/5 and all. I warned buyers that this E-book is ripped but no one believed me and then they payed the price the guy accepted that the E-book was ripped.

So what to do you make out from this some Ubers just rate the E-book 5/5 for what getting it free and in some cases friends and relations work remember this. So never ever trust Leets and Ubers reviews as that may be a Pre-Planned scamming. Possibility is Uber may be indulged too?.

This is the reason i stopped reviewing Un-officially as i don't what to be included in bunch of fucking scammers.

So the thing is what should we do then

Only & Only trust Official Review Group Members

[Click This To See Official Review Group Members](#)

Yes copy this statement to your brain. These official members are chosen very carefully and they are governed by leaders too so there reviews are always Un-bias and 201% trusted. So never ever buy a E-book without there review.

Scammer plays this trick. He starts a thread and says this and that about the E-book and claims he have pmed official reviewers and all then you guys believe him and as sales thread is awesome in look and all. Within three days around 20-50 copies are sold as they give review copies to so called "Leets And Ubers" and they give 5/5 and then you guys purchase it and then you cry. But the reality is Scammer never Pms Review Group Members. Because then Kick There A***.

So don't buy a fake E-book in eager wait for 2 days[Usual Wait Time For Official Review] then buy it as in 2 days you will not become Millionaire.

Limited Copies Crap

Yes now come to this 80 percent scam E-books will surely keep this tag as that's the plan they want you to purchase E-books in 2-3 days as then people start pointing on them but till then every thing is over.

I agree that Limited Copies is legit thing but believe to this statement also after Official Review Group Members Approve that else you will fell into there planned traps and then you cry and you know what happens no once cares even.

You are crushed under review shit

Yups this is reality guys sometime a scam and ripped guide keep selling un-noticed why why?

The answer is whenever someone points out anything against it Thread Starter shows you "Unofficial Reviews" that are nothing but a planned scam attempt tools.

Those reviews are nothing less than Missiles fired to New Buyers and they fell down into pot of scamm.

So in that case once again what we learn Never Trust Leets and Uber Reviews though i am also Uber.?

Suggestion-"Always report Ripping Notification To Official Moderator"

Yes now also if you don't believe me like guys liable to scammed do. Whenever you think that this may be ripped or copied paste don't paste in threads as the scammer will crush from Un-Official review thing so report directly to Official Review Group Moderator. If possible with proofs as that makes his job easy as he have to do loads of job right.

I hope these things prove usefull to you.
I wish you Safe Purchase On HackForums.Net.

Now potential fraud people and scammers will attack this thread with negative thing as this will expose there attempts and makes buyer more alert!!

Okay sellers are having trouble also in E-book section and the biggest one is Chargeback and Ripping. So please use following ways they will help you to stop chargeback and ripping. I use these methods now.

PayPal Knows Everything

Yes sir this is true Paypal is aware of everything what you do okay so never ever use that donation method to get payment for a product that is your E-book. As if the buyer complaints them then you are in big trouble, even if you are verified as that violates TOC of Paypal.

My friend just lost 500USD due to this thing so better be aware now or you may face same thing. BTW donations from HackForums ahm ahm just think about it. Though HF is white hat forum but it's name is Hack Forums.?

How to Win Chargeback's

First of all bro use that buy now button and be trust worthy with paypal cause they hold your money and they can do anything you want so better follow their rules. As paypal will not give you warning before banning or limiting your account like HF staff members: D/

Okay so now the scammer issues chargeback what to do?

They will give following option

Shipping details if product send.

I will refund the money i haven't sended them.

I will negotiate.

None of these apply.

Sorry the meaning is same words may be different. So does this click on None of these apply then a blank space comes up. Write truth and flatter them i write this "Sir the product i am selling is E-Book that is sended using Electronic mail and here is screenshot that i E-mailed him the E-book. After payment the buyer replied to me for refund but sir he accepted the TOC that it is not liable for chargeback. But he says that he can exploit paypal. I am a honest person but that guy is sir over utilizing PayPal golden rule sir so please take strict action as i am always honest with paypal and for all online payment i trust the name that everyone trusts PAYPAL"

Voila money is back to you account and you are happy.

Works for me 100PERCENT success rate.

What to for Fraud Payments or Say Stolen PPs

Ok dear seller i have the way to be safe from scammers in case of fraud payments also.

Sometimes fraud payments happens because the buyer is not verified yes that's true paypal is running a campaign in my opinion they are limiting almost all paypals if they are not verified and person purchases anything.

Or sometimes fraud payments happens really but that's very rare.

Most fraud paypal cases are due to method 1 you will believe me just check all fraud paypal payment emails they are not verified.

Okay so for this also

Shipping details if product send.

I will refund the money i haven't sended them.

I will negotiate.

None of these apply.

following options will come

Choose "I will refund the money i haven't sended them."

And once again write truth. Right dear buyer i don't know what happened someone payed from your email for my E-book that i sell. But paypal says this is fraud payment. I think your paypal email is hacked so please change the password and all and i am refunding you the payment "THOUGH I ALREADY EMAILED YOU THE EBOOK" so please inform paypal officials about this as i am honest person and i don't want Paypal to not believe me. Sorry for in-convince i hope the person using your paypal haven't caused you enough damage.

Works for me got payment back to my paypal 99 percent times.

Ripping Cases

For ripping we can't do much but we can protect global ripping :D/

Never sell you ebook to person accused of scamming.
Always keep your E-book password protected
Never give free review copies to Non-Official Members.

Okay i put in many secrets here so if you are happy enough then :D:D:D You know what you should do.

I think i must have made a E-book on this with bit more details?.

I request Officials To Make This Sticky?

Whynot? - August 5, 2010, 11:20 pm

US SCAMMERS DONT DO THIS.

I'm kidding. Nicely written and good information.

Good job.

[[R9]] - August 5, 2010, 11:27 pm

Thanks very much for appreciation.

This Proves You can be trusted in sales.

Cheers!!

Robie - August 5, 2010, 11:27 pm

Great guide, Hell you should sell this as a ebook ?

Up to now I trusted the unofficial reviews, But I wont be from now on in.

[[R9]] - August 5, 2010, 11:31 pm

If you guys don't trust me about un-official reviews then i can link them but probably as ubers and all are allowed to delete and edit posts they will do that.

Decoy - August 5, 2010, 11:32 pm

99% of the time ebook sellers get scammed by people paying with stolen paypal accounts / fraudulent payments. Not having their ebooks ripped..

very true , its not like everytime buyers get scammed or cheated but most of the time sellers get scammed or cheated , if you go to scam section then you will know that most of the threads are by sellers not by buyers (For ebook section) some buyers pay using hack PP or some just chargeback without any reason

[[R9]] - August 5, 2010, 11:45 pm

It is because sellers are experienced and all and have lot of support.

Buyers are in most cases new people who join HackForums.net with silver lining in there mind.

In most cases buyers think that the method is not working from them and all some methods of 3 pages are sold for 17USD and have 5/5 reviews so if the methods is shit also then new people never raise voice againts that because they think the method might be that value as reviews say so.

Buyers are new so pre planned scammings usually overpower there saying.

MR zooro i have stated that also very nicely and clearly in first point so open you fucking eyes and see.

Great Prosperity - August 7, 2010, 12:24 am

I was gonna write a guide like this myself but thought someone like you would do it better.

Iv'e never been scammed in my life. Its natural for me. But a great tutorial for noobs.

[[R9]] - August 7, 2010, 12:38 am

Yups, but wait not only for noobs usefull for sellers that get scammed regularly.

Never trust Un-Official reviews guys.

Snipeshow - August 7, 2010, 12:56 am

the only difference between ub3rs and regular members is the pretty colors.

[[R9]] - August 7, 2010, 1:09 am

WTF why is this shifted here.

I posted this particularly for E-book section.

Once again random shifting.

Big Fat Ells - August 7, 2010, 5:33 am

This seems pretty sweet.

Thanks.

[[R9]] - August 7, 2010, 6:05 am

Thanx for that.

I am glad you guys like it.

AcID © - August 7, 2010, 6:25 am

Good Post very informative

Cognitive Decline - August 7, 2010, 1:53 pm

I read this, and then I tried looking at the comments and they all looked almost purple (Most likely from looking at blue).

Good tutorial on this, I never thought about kissing paypals ass when I am mad at them lol

[[R9]] - August 12, 2010, 9:32 pm

Yups pay pal likes it really if you lick their ass.

So go for it.

Atleast we have to that for bucks.

Arete - August 12, 2010, 9:34 pm

I've never, EVER.

Ever.

Been scammed. Every single trade.

I'm smart :)

If any one wants to use me as a middle man, Feel free!

[[R9]] - August 12, 2010, 9:40 pm

Middleman thing is too time taking and problematic.

PayPal fees in India and such countries is too much guys.

What will you do for ripped E-books.

qqhf - August 12, 2010, 11:28 pm

This is 100% correct. I even write ebooks and admit to it but the methods I put in my ebooks are very possible. If customers asks for a refund, I give him one without any judgement. I have bought ebooks wasted over \$30. All fucking bullshit and pissed me off. DO NOT BUY ALL THE MONEY MAKING EBOOKS ALL RUBBISH.

[[R9]] - August 13, 2010, 12:09 am

Yups thanks for support that's why omni made a official reviewers group but the thing is no one cares for official reviews and users just fall prey to un-official reviews and trust me 90 percent those reviews are corrupt and planned.

Make a rule against un-official reviews.

Sithis - August 13, 2010, 10:20 am

Otherwise, its a great post.
