(Jan 5, 2019 11:16 AM)_CASP3R_ Wrote: [\[CITE\]](#) Hello, I just thought id ask a question and see if anybody knows because ive been trying all day.

Basicly What i want to do is launch a remote desktop connection and immediately hide it. What i can already do to some extent. Basicly it hides the connecting window instead of the window when it connected. I know its possible to do because i tested it with a button. but i wanna do it automatically.

Here is my code.

```
Code private const int SW_HIDE = 0;
[DllImport("User32")]
private static extern int ShowWindow(int hwnd, int nCmdShow);
```

```
Process rdcProcess = new Process();
rdcProcess.StartInfo.FileName =
Environment.ExpandEnvironmentVariables(@"%SystemRoot%\system32\mstsc.exe");
rdcProcess.StartInfo.Arguments = "/v " + ""; //
rdcProcess.Start();
```

```
foreach (Process process in array)
{
    if (process.ProcessName == "mstsc")
    {
        int hWnd;
        hWnd = process.MainWindowHandle.ToInt32();
        ShowWindow(hWnd, 0);
    }
}
```

PHP Code

```
<?php
```

```
Dim RDP As New ProcessStartInfo With {
    .FileName = "mstsc",
    .Arguments = "/v: 127.0.0.1",
    .WindowStyle = ProcessWindowStyle.Hidden
}
```

```
Process.Start(RDP)
```

EDIT : sorry I thought it was VB section.

PHP Code

```
<?php
```

```
ProcessStartInfo RDP = new ProcessStartInfo()
{
    FileName = "mstsc",
    Arguments = "/v: 127.0.0.1",
    WindowStyle = ProcessWindowStyle.Hidden
};

Process.Start(RDP);
```

Hey man... Just tried the code. The window still appears.

Guys pleas don't delete the questions this is just dumb, without ??` NYAN CAT ?´ we wouldn't have know later on what the question for that solution was.

So pleas don't remove the question or change the title...

There is a reason why there is a option to close a thread.

This is honestly my preferred way of launching other program's with the Process class:

```
Code if (new Process
{
    StartInfo =
    {
        FileName = "mstsc",
        Arguments = "/v: 127.0.0.1",
        WindowStyle = ProcessWindowStyle.Hidden
    }
}.Start())
```

```
{  
    //Process has started  
}
```

Yup I agree with you.

I mean the rdp window, I want that hidden not just the connecting window its still appearing on mine. Thanks again for helping.
