Thread: [T4L3N7 CTF - ftw | Prize: 1000 Bytes | Only one winner](#)

Nick (Name) - January 6, 2019, 12:38 am

Here's to another challenge to start of 2019, another stenography challenge, it is a lot tougher than the last but nonetheless can be completed. Who ever completes the challenge can post a write-up on how to do the challenge if you'd like, but there can only be one winner that acquires the bytes. Once you have completed the challenge please send me a PM and I'll validate the flag you've found. Once a member finds the flag the post will be closed, so keep that in mind so you're not PMing me for a closed contest. Good luck and have fun!

Prize: 1000 Bytes

Challenge: <https://media.nick-name.net/ctf/ftw.zip>

Default Archive Password: nickname

Flag Format: NICK{s0m3t3xt}

After noticing I selected one of my harder challenges, I've doubled the prize. This challenge is harder than I originally made it out to be, still no hints will be given.

Ram - January 7, 2019, 11:27 am

Lol, lets see what I can do :D I'll give it a go :D

Nick (Name) - January 7, 2019, 4:27 pm

Sorry! Not sure if others have tried reaching my site but it was down due to a certificate transfer, I uploaded the wrong certificate and did not even notice. My site is back up and links are now live again.

Bacardi Cola Lime - January 8, 2019, 7:27 am

I've enjoyed doing google's CTF beginner challenges not much time ago so I'm excited to give this a try.

Njord - January 8, 2019, 11:57 am

Ill be Running in the 90s!

CASP3R - January 8, 2019, 12:01 pm

Running in the 90s! Yesss.

Polymath - January 8, 2019, 6:08 pm

I am about to give up on this, feels impossible!

PerfectDudeGuy - January 8, 2019, 6:12 pm

not much of a prize for the work it would take

Polymath - January 8, 2019, 6:20 pm

If you want an easy 50 byte prize all you have to do is go rep someone, I'm tired of seeing these threads in the contest section, I wanted something different. Besides I solve challenges just as difficult as this one for the fun and learning experience. Once I acquire 2k bytes, I'll double the prize again.

(Jan 8, 2019 07:08 PM)Godfather6 Wrote: [\[CITE\]](#) I am about to give up on this, feels impossible!
The challenge is completely doable, it's not like the common easy to finish challenges in under 30 minutes, I made a mistake for posting a rather difficult one. It's challenging, but you'll learn how much data you can store inside an mp3 after post processing.

Haseo™ - January 9, 2019, 3:28 pm

Awesome contest Nick

I wonder if I heard about you setting this up or not I don't remember may do the challenge myself little later tonight.

Hope to see you soon bud.

Ram - January 11, 2019, 2:19 pm

Did anyone manage to complete it yet?

Nick (Name) - January 11, 2019, 2:52 pm

Not yet, another one will be posted next month even if this one isn't completed.

SIM-3364521 - January 13, 2019, 7:59 pm

found a password in the image but no where to enter it so im just listening to "rolling in the 90s" for the last hour

month is over now and i did give up on it. Can we please have a writeup/soulution?
feel like i am the only one who even tried

okay i got that wrong i thought the challenge is over after one month.
So i will have a look at it again once i have time.

PotatoesEater - February 8, 2019, 2:57 am

So close yet can't find the last flag within the steg output

Karanaggarwal395 - *February 18, 2019, 12:53 pm*
will get back to it tommorow.
