(Jan 21, 2019 11:45 PM)4lexus Wrote: [\[CITE\]](#) What's the speed of the VPS? Is it shared/dedicated? Can you share a speed test? 1gbit, shared.

I guarantee 200mbits, but it should be 400-600mbits 99% of the time :)

Most important is that it is bulletproof ;)

I have pm'ed you a speedtest.

You don't need to apply -B parameter to zmap and the VPS will run the scan at the most optimal speed.
Also, 230kpps means 230000 packets per second, so that's a lot for scanning.

If you do not apply -B , zmap can scan at max speed. I know this. But in this speed there will be much of drop packets. And this makes the result not good. Especially when you try to scan NTP/SSDP such thing.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.
