Thread: [\[REVIEW\] Profit Maker Program by Xjamer](#)

MrNacho123 - January 6, 2019, 3:47 pm

Product: <https://hackforums.net/showthread.php?tid=5882291>

This review is 100% unbiased and proof of purchase will be provided upon request.

What caught my eye about this product is that it was "different" from the typical HF money method. It was not an ebook and it was not a 1 on 1 tutorial. It was a program. To me, it seemed too good to be true. But after using it, I found it easy to use and it makes me anywhere from \$50 to \$100 a day. Basically, you put in Bitcoin and get PayPal back. The process is very straightforward and OP is great with support. I can always count on him to respond in a timely fashion and answer any and all of my questions. Prior to purchase, he gave me the opportunity to talk to and question others who were also using his program. OP is transparent about his product and hides nothing. He does not promise "\$3000 A MONTH!" but it really does seem possible from what I have experienced. When it comes to payouts, they are often speedy (<48h) and OP included a transaction checker within his program. Overall, I am very satisfied with my purchase and have never made my investment back quicker using another method. Please feel free to message me any questions. Proof of earnings are below.

There's more but I think those four screenshots do justice.
