Thread: [\[Rust Cheat\] Gorilla Recoil | Recoil Cheat | \\$15 LIFETIME | Rust Hack](#)

Hastur - January 7, 2019, 8:11 am

Also accepting Amazon Gift card, contact me via PM to purchase!

Changed the price drastically and removed the 1-month option since I am going to close this and make a private cheat that includes silent aim, esp, and legit aimbot. Which is going to be invite-only. My targeted group of users will not be here on HF since there aren't many Rust players here.

Grab your lifetime license for \$15 and you might get invited to my upcoming cheat in the near future.

Kind Regards,
Hastur

Link to purchase: <https://selly.gg/@GorillaRecoil>

[Video: <https://www.youtube.com/watch?v=sm4kkdtleJ4>]

If you've got questions or want to preview it send me a PM.

Giving out 1 vouch copy for 7 days.

I'll be choosing a trustable member who comments on this thread.

Kind Regards,
Hastur

Frukt - January 7, 2019, 3:30 pm

I was in a call with Hastur a few days ago and he shared his screen to show this hack in action and it was really good, nothing some shitty script can do.

You become godly with this hack and if I still played Rust I would buy it.

Good luck with sales!

Hastur - January 8, 2019, 4:21 pm

Just added a video preview of it, haven't had much time lately to record but I will make a better one later if you guys want.

The cheat is constantly updated by me. Working on an ESP which will be added in the future.

AstolfoClient - January 8, 2019, 4:56 pm

Not to sales trash, but this just looks like one of those mouse event "RCS" programs that have been floating around even their source, and once again not to trash your thread which i'm sorry for basically doing it but this look's exactly like GX's recoil script especially with the console being named "Internet Explorer" which used the same exact thing and got detected. If you're using mouse_event or send input or if its in another language and not C++ like C# and using some method from user32 library or whatever library it is, it will eventually cause your users to be banned

as that is what happend to GX. People should just know what they're buying if they decide to purchase this.

Anyways if I'm wrong
GLWS.

Hastur - January 8, 2019, 5:19 pm

You got a fair point, and yes this method is frequently used to bypass EAC.
It's been undetected for a very long time and I'm sure this won't happen unless someone sends in the file to EAC.
I'll be frequently be updating this client and I'll be adding ESP asap.
This whole software is completely programmed in C++.

Kind Regards,
Hastur

Sp33dMaster - January 8, 2019, 5:59 pm

Has this been tried and tested? If so how many games and for how long?

JuJu . - January 8, 2019, 6:56 pm

Will be purchasing the second you add ESP!

Pretendgamers - January 9, 2019, 9:34 am

Definitely interested the moment you add ESP to it

Hastur - January 11, 2019, 9:26 am

DeadInside69 - January 11, 2019, 10:31 am

PM Me your skype or discord :) I'm interested but have a few questions and I can't pay with bitcoin :/

Hastur - January 11, 2019, 10:56 am

(Jan 11, 2019 11:31 AM)DeadInside69 Wrote: [\[CITE\]](#) PM Me your skype or discord :) I'm interested but have a few questions and I can't pay with bitcoin :/

Only BTC at the time, my paypal is limited atm.

DeadInside69 - January 11, 2019, 11:29 am

Can we still PM on another platform I want to speak about a few things if you dont mind.

Cant PM on here.

Trip - January 11, 2019, 11:38 am

Interested in this if it comes with esp etc....

Evil - January 11, 2019, 1:36 pm

Considering the fact that you have to manually press a button to set the recoil pattern it can be assumed that this program in no way directly interacts with the game client? If so, how is this not just a script written in C++?

Hastur - January 11, 2019, 2:20 pm

(Jan 11, 2019 12:38 PM)Select Wrote: [\[CITE\]](#) Interested in this if it comes with esp etc....
Once that update hits I'll make the cheat invite-only.

JuJu . - January 11, 2019, 9:06 pm

Aré we able to be invited ? If so I'm interested. If not it's okay just let me know so I can look else where. Seems hard to find a quality rust cheat. If you can PM me contact info also that would be great. Thank you

Hastur - January 12, 2019, 5:02 am

The customers I already have will, of course, receive an invite.

SadlyNo - January 12, 2019, 5:36 pm

Nothing but happy with results, and OP even offered to customize it to my DPI for my mouse which is better than perfect support.

-
Edit: OP is very nice and helpful but I was VAC banned and it sucks since I have like 2k hours and years of history, again OP was very helpful and offered a new account but I rather have my VAC removed lets see if I can trick Rust to think they made a mistake :).

Thoughts: I think you should buy and use a alt account for now since it works wonders and the future updates sound fun but I would beware using on main account for now.

Hastur - January 13, 2019, 7:30 am

Still up for sale for a while.
Debugging the legit aimbot right now.

DrDogger - January 13, 2019, 4:49 pm

I can't PM you , can you please PM me?

lmao - January 14, 2019, 4:04 pm

I bought it and added the discord it said, and you blocked me & deleted your messages after I showed you a screenshot of payment and asked for the download. hmm

Hastur - January 14, 2019, 5:01 pm

What???

You added wrong Discord dude.

PM me and lets solve this. If youve paid then PM me here.

Yea I retract what I said, my apologies.

It got a little confusing my friend bought it for himself and said he got blocked after he paid, but hes an idiot.

Sorry

hamderc - January 16, 2019, 11:50 am

Hello dude, will u be able to send me a PM i want to buy it! :)

Crypterrr - January 16, 2019, 10:50 pm

I'd love to buy it, Unfortunately you only take BTC for the available lifetime scripts. I only have PayPal and thought it was an accepted payment method due to the post. Let me know if you have it available for Paypal as I do not own any BTC currency. I'd Buy it asap!

Thanks a ton!

Hastur - January 17, 2019, 9:09 am

I messaged you through the PM system.

Kind Regards,

Hastur ?

johny878787 - January 17, 2019, 4:46 pm

Looking to buy also but don't have BTC can you PM me also?

Spent 20mins trying to setup a BTC account FML.

Need to go to work soon if you are unable to take paypal I can try again with the BTC but it's confusing to setup for a moron like me.

I just wanna shoot people on rust.

Nick5020 - January 18, 2019, 5:18 am

Looking to buy, sent you a PM.

Teemǎ - January 19, 2019, 12:19 am

Highly interested. Will be messaging you. :)

vhfsh123 - January 19, 2019, 4:54 pm

i really really want to buy it but its crypto is it a way i can buy it through something else?

Hello what is your discord i really want to buy it

SadlyNo - January 19, 2019, 8:45 pm

100% Detected keep looking, also

Im pretty sure he stole the script from MPGH, I used that version and his and they are 100% the same. PM Me for link I can provide proof.

Lastly, I opened a dispute with my claim about how he stole it, he attacked me (and made a fool of himself by acting like a child) and offered to show proof, I said sure send it. He never did.

Yep, also I found him on another community (PerfectAim) where they banned him for MANY reasons haha, turns out he has a scummy history.

You have no idea who I am on PerfectAim so that speculation with me getting banned on there is false.

I did not steal the script, you have no proof of this.

My code is way beyond more advanced then the pasta you sent me through Discord.

I'm glad though I blacklist you from the invited list.

Keep on sale trashing, won't affect my full product when it gets released.

SadlyNo - January 23, 2019, 10:20 am

Your a scammer and I hope this forum bans you, many reputable people agree :). Many reputable sites have banned you :)

Hastur - January 23, 2019, 7:22 pm

Can you prove those statements?
Otherwise its just sale-trashing, and completely useless to my thread.

SadlyNo - January 23, 2019, 7:23 pm

All the proof I need, anyone who wants PM me for proof.

Hastur - January 23, 2019, 7:24 pm

(Jan 23, 2019 08:23 PM)SadlyNo Wrote: [\[CITE\]](#) All the proof I need, anyone who wants PM me for proof.
What exactly are you doing here? You have no Idea who I am on perfectaim.

(Jan 23, 2019 08:24 PM)Hastur Wrote: [\[CITE\]](#) What exactly are you doing here? You have no Idea who I am on perfectaim.
You are just an upset customer who got manually banned by EAC, and dont have any patience at all. Please quit sale trashing.

Hastur - January 25, 2019, 5:12 pm

Closing thread since my full release will be coming soon.
