Thread: [I need a hacker for a website and I offer partnership](#)

kinomino - January 7, 2019, 10:33 am

I need a hacker for a website to get database. Sadly sqlmap doesn't work if you ask for this. I already got an offer but too expensive for me for now. But I have people possible customers for buy any data in time and make you/us money. You can hit me up via PM.

THE CONTRACT CONTINUES OPEN IN THIS CASE

I need more information and I would also need a reference link

leave me your skype or talk to this facebook

Still looking. Please don't come with "give me money and wait" I don't have big amounts money to pay, I offer a continuously partnership. Hacker can keep database and get money from customers for small infos. I hope there's someone who can accept this offer.

I repeat I offer partnership, I don't say -give me database for free & give info then wait for money. I say - get database, take customers and money, give me the small data I need.

? Good luck. Why would anyone do it for you when you give the URL?

I would rather do it myself and take the entire profit instead of your crappy partnership...

Use logic here... You won't get this hacked at this rate.

Because It's about a social game. Since I know players, having many friends, I know who'll pay for learn each others secrets. So this profit will be endless and continuously with a player like me. Sure hacker can get database and make profit different style but I believe my partnership is will be more profitable :/

Well you're wrong. No one is interested in doing your dirty work for you unless you're paying.

Okay. How can you trust to anyone if multiple people pm and say "I can do for 100 usd and in 1 week, I can do it for 2 BTC in 2 days, I can do it for you in 2-3 days for 500 usd"

It's strange as a customer

Go by trust. Is the member highly reputable with proven track record of delivery? Analyse market rep.

For a website hack, if you are looking to obtain the database no one will do it for 100USD. That's an obvious scam who ever said it to you. When I conduct database breaches I charge anywhere in between \$1000-5000 depending on the value, traffic and strength of security of the website and server. Otherwise it's not worth to run the risks.

OFFICE365 - January 10, 2019, 4:35 am

pm iv been hacking since 2010 i know many things especially websites

Understood. Actually we're talking about a database which contains 80-90k mails and generated passwords. Well actually partnership part includes something important it's above user login infos or something. Almost everyone who pm'd me wasn't old or highly trusted in here and i always smell scam. If you can PM me I want to tell and show you something in private and ask your opinion. I don't want to post it in public.

Ok?

I've messaged you.
