Hi HF!

I works as Full stack developer in agency.

Looking for everything! Mostly I'm here to learn, but i also look for social media services.

Welcome man, where did you learn from to become fullstack dev?

I have always been interested in tech, I started my journey (2003-2006) with setting up sites with PHPNuke back in days, mostly just a webmaster, I had one big site for downloading mp3 and maybe 3-4 blogs. I learn most of the basic thing from youtube(mostly thenewboston). started as a front-end developer and after 3-4 mount beeing trannie I got my first job(2010).

The learning never stops! The grind don't stop, I moved slowly to backend development, beginning with Wordpress then Drupal and then Laravel. Did some mobile apps with Ionic/Cordova.

Today I work with React and Wordpress daily.
