Thread: [Help me choose spartan or Darkeye protector crypter?](#)

HHHOH - January 9, 2019, 9:25 am

I'm having a hard time deciding which of these crypters to buy, pls has anyone used any of those, kindly refer which is best thanks.

Well what are you trying to do with the crypters? RAT? Botnet? Your own coded malware?

I like that spartan is Native. But i hear that they dont stay FUD long. I havent had this issue.

They're both native languages. One is ASM and one is c++ from the sales info. If you're looking for long FUD i'd stray away from the more popular/cheap/highly used crypters so the stub usage base is lower which should help keep FUD longer.

i want to use it with a RAT, preferrably with # or NJRAT.

pls which crypter do you recommend bro? dark eye or spartan?
