Thread: [BustaBit Script 2019 Efficient Ever](#)

heart4hack - January 10, 2019, 5:26 am

Hello All,

We have made BustaBit script more efficient and safe by doing trial and error method, lost money in many cases but found 2 scripts in which I'm going to share it with HF the community. Only 15 copies will be sold and 1 will be the vouch copy. ?

Download the bustabit script from the below link:

<https://satoshibox.com/vbuzw537s8jwyu5en2qkpcu>

This is one of the efficient bustabit scripts.

Invest 4000bits and base bet 10bits, You can increase this up to 50bits. But 10 is safe.

Your earning depends on the investment. From the above settings, u can earn 50-150% per day.

Just run the script on VPS or any system, When you reach 100% of the investment, Cashout and invest the base amount, and continue the same process.

Available copies: 10

Review the script once you purchase it. 1 vouch copy will be given! ?

good question, it could be a strong proof of the script working.

heart4hack - January 10, 2019, 7:28 am

Wait for Kringle s update. That's why I have given the vouch copy

silverstar - January 10, 2019, 7:28 am

Yes, earnings proof and video of the script working would be great.

How much is 4000 bits?

How long do we leave the script running to earn 50-150% per day?

Do we need to take breaks (turn it off) while running the scripts?

Stop tricking people into thinking you can make money from gambling, in the end you will ALWAYS lose money, this is simple maths lmao, y'all out here speaking like bustabit scripts actually are some sort of business, bruhh

50-150% ROI per day but doesn't show proof of this method working on this acc, not fishy at all

?Criminal - January 10, 2019, 11:50 am

no gambling scripts are efficient imo, gambling is gambling whether you automate it or doing it

manually the odds don't automatically change in your favor, there is always gonna be the house edge but good luck with sales anyhow.
