Thread: [Free Amazon \\$10-\\$15 Credit](#)

Simple, go on your amazon account purchase a \$50 amazon giftcard (Hardcopy or eGiftCard - email it to yourself or mail it to yourself) used the code 19GIFTCARD or 19PRIMEGC (19GIFTCARD worked for me.) Should work for first time amazon gift card buyers only. Not sure if you can use the coupon code again after purchasing, if you can, then \$15 will be stacked everytime, you'll just end up with a bunch of \$50 gift cards.

No clue bro, just put a \$50 amazon e giftcard in your cart and enter the code, it'll tell you if it works.

You get \$10 or \$15 bonus after you purchase a \$50 giftcard. Not sure if you can reuse the code. But if you can reuse the code multiple times, lets say you do it like 10 times or do it on 10 different accounts, you get \$10 or \$15 everytime but it goes into the account. You can always use that \$50 giftcard yourself or you can sell it.
