Thread: [\(\\$100 Prize\) Ultimate Battle of the RATs](#)

StupidWalrus325 - January 11, 2019, 2:00 am

What are your thoughts? What's the best?

- 1)Quasar vs
- 2)PUPY vs
- 3)Njrat vs
- 4)Netwire vs
- 5)MetaExploit/Metrepeter vs
- 6)Armitage GUI for MetaExploit/Metrepeter vs
- 7)WebMonitor?

PUPY covers Windows, Mac, and iOS & Android so I think it could be the best. But MetaExploit/Metrepeter seems like a very amazing tool and a GUI for it is nice for a noobie like myself.

i will choose this

- 1-#
- 2-netwire
- 3-warzone

I.M.P - *January 11, 2019, 3:54 am*

Quasar

#

WebMonitor

Fisher - *January 11, 2019, 3:57 am*

Will choose nothing, because all these rats except "#" are copy paste shit [no offend just me opinion] .
