Thread: [email and MIME handling package](#)

Robin2 - January 11, 2019, 6:04 am

I started looking for information about email and mime handling package it is very difficult for me to understand even the contents itself in the library. this is the only module i have trouble with...

Before that i learned about the smtplib module and everything went well

but the Email module is different although it's included smtp module for final transfer....

if there is any of u that can help me? tutorial?, pdf?, good explanation may help...

thankx anyway

You could use the sendgrid API to send emails.
