im not a scumfuck bastard whos gonna make you pm.

if you missed hacktoberfest, sux4you because i got myself a cool shirt, some stickers and digitalocean credits.

but the digitalocean credits wont rly work for me because you need a new account. yeah, i know i can just make one and i probably will, but i figured ill share it here.

you need a valid credit card to sign up for the trial (go out and buy a prepaid visa, nerds)
the credits last a total of 60 days (50\$ a month i guess)

without further ado: <https://do.co/hf100>
(thats their shorturl that they included in my package this morning.)

you shouldnt need to actually do hacktoberfest for these to work. they say on the sheet that im welcome to pass this code on to people, so go nuts.

have fun kids.
