Thread: [\[Rust\] Selling Private Rust Cheat](#)

Bladee - January 11, 2019, 5:28 pm

Proxy selling a private Rust cheat. The developer wants more subscribers.

Cheat is \$300/mo
BTC only
Slotting around 25 users for now.

25/25

The cheat is Linux based and requires some prerequisites, everything will be setup for you manually in TeamViewer.

Cheat features:

Aim ESP (functions w/ Silent Aim and will fire on aimkey when your reticle hits the ESP box.)

Loot ESP

Player ESP

Basic ESP for just about every entity (Animals, TC, Crates, Food, etc.)

Silent Aim w/ hotkey

Triggerbot w/ hotkey

Debug Camera w/ hotkey

Instant Move items

Eoka First Shot always

Team Whitelist

Ambient Patch (removes darkness in caves, military tunnels, tunnels, etc.)

Daytime Patch (24/7 daytime)

More information will come with the cheat once you've been setup. The cheat is 100% UD due to it's method and in the event of a server ban/game ban due to "going too hard" or ragehacking, you can always easily restart with a new account and still be UD for as long as you manage to stay silent, any bans that given are due to your playstyle. This is a god-tier legit cheat if you play safe and smart.

I've been using it for close to a month with no ban playing somewhat safe and not 24/7 silent aiming enemies.

PM me for more information, no time wasters, contracts are fine.

If so, this cheat is definitely legit as the dev is well-known within the Rust cheating community.

Kev's cheat is good if you can't get into any other private cheats, and is probably going to stay undetected for a long time.

Otherwise, your best bet is Hypercheats if you're looking for something cheap but it's constantly detected.

Bladee - April 6, 2019, 12:56 pm

I'm unsure of what Kev wants to sell this as, I'm probably sure it's still around \$300.

His method used to require 2 GPUs, but no longer needs them I believe.

If you want a HQ and UD cheat that can even continue to be UD if you get manually banned, then this is the cheat for you.

If you play blatantly, you will eventually catch a ban due to reports, but the method allows you to INSTANTLY start on a new account within 5 minutes, granted that you have a new account ready.

It's really nice to have for hardcore players.

getcha bread up bb ?

it's also bc there's a lack of UD Rust cheats and his just happens to have really good features on top of being UD
