RESURGENCE TRADING - Your new Crypto Family

Make profit by trading cryptocurrencies. It's easy, just COPY | TRADE | MAKE PROFIT

How hard can it be? Well, quite difficult if you are trading blindly and don't know what to trade. Especially when there are over 2100+ cryptocurrencies in the market now.

RESURGENCE TRADING - IMPORTANT ANNOUNCEMENT!!

Due to constant request & demand by members, the pricing structure has been completely changed for our memberships.

Firstly, we now have Lifetime membership to our In-House signals & community - get it from us for \$150/Lifetime

(Value for money - Please read pricing structure below)

Secondly, we now have an additional package Premium signals providers which cost over 4 BTC/month individually - get it from us for \$95/month

(Cheaper than our competitors - Please read pricing structure below)

RESURGENCE TRADING - What do we aim to provide?

Over at Resurgence Trading - not only are we aiming to provide Top-Notch signals, but we are also aiming to create a fledging crypto-community.

Where we make traders out of you all, all things can 'look hard' when you aren't familiar with it. We will teach you the basics & guide you into making actual \$\$\$ by trading cryptocurrencies.

We took this initiative because firstly, cryptocurrencies are still in its infancy stage with lots of room to grow.

(Which means lots of money for us)

And No!! We are not promising you Moons & Lambos but Everyone wants to make money...

So, what we do promise you is a greater financial freedom as long as you dedicate yourself into following our signals and grow alongside us.

Nobody becomes a master from day one, it's a journey and no one says that you have to be alone

in that journey.

"So, let us guide you into making an actual profit."

RESURGENCE TRADING - What can you expect from it?

How to properly trade without having to lose your sanity & money and most importantly, making actual bank.

This is not some fancy E-Book promising you \$500/day or \$10,000/month on auto-pilot without putting in actual work.

This is actual money and while this may not be fully autonomous, if you follow the trades - you can make serious amounts of money.

Expect to earn money like this (February 14th, 2019):

RESURGENCE TRADING - FAQ

Spoiler [\(Click to View\)](#)

Q: Is this illegal, unethical or blackhat?

A: No! This is 100% legal & whitehat (This is trading).

Q: Does this work worldwide?

A: Yes, it does. Location doesn't matter.

Q: I'm under 18, can I still profit from this guide?

A: Most trade exchanges need to verify you and your identity for higher withdrawal limit, so even if you are under 18 or 21 - you can earn.

Q: Do I need to invest money?

A: I'd recommend at least \$100-200. Bigger your investment & capital - the bigger your returns.

Q: How long until I see earnings?

A: Once signals are posted, anywhere from 48-72 hours, sometimes longer depending on market conditions or sometimes within hours.

Q: Do you offer refunds if I don't earn any money?

A: Since we are selling our services, we can't do that - however, rest assured. You will 'make' money. This is not some 'E-Book'

Q: How can I get paid?

A: Via BTC or ETH depending on the pair you are trading against.

Q: How much can I make in my first day/week/month?

A: That depends on you and how many trades you follow. In Jan, 2019 - we have posted signals which collectively netted over 200% in 10 days.

Secondly, how much you invest - decides the returns per trade. (For example: 25% of \$100 is \$25 vs \$250 of \$1000)

Q: Do I need any special skills, knowledge or anything like that?

A: You do not need any. Just COPY & FOLLOW - What you don't understand, you ask us and we guide you.

Q: How long does it take to setup the buy signals?

A: 2-3 minutes to set up the SL & buy the signal and that's it.

Greetings Rockstar, thanks for your interest.

Well, there are no set patterns on signals. Because as of now, we are only providing (In-House)
signals (Which are signals provided by us). However in the coming weeks - you will have access to
70+ premium signal providers at no extra cost at which point, you will have signals every single day
spread out between hours.

We always like to project a grounded percentage but in just the 2 weeks of January 2019, our
(In-House) signals has grossed over 500% in profits. So, to keep it reasonable - you are looking at
200-300% a month. As of the winning rate, it has been 42 Wins and 4 Losses which equals to 91%
win rate for the month of January.

Thank You for your kind words.

As for the experience in trading, I have had a few requests & questions asking me something similar along those lines.

Q. Can I join, even if I don't know much about trading or don't know anything about trading at all?
A. Since I am not aiming to make this a signals only group/community. I am actively trying to help out members become self-sustaining traders.

I will teach you the basics and how to follow them in the real world. Basically, I will be mentoring you.

As time passes and the community becomes larger, you'd have other people to reach out to and share experiences. That's my end goal.

Looking forward to having you.

Firstly, I fail to see how my portfolio correlates to the services being provided.

(Besides it is private information and it is confidential - if it was relevant I'd have posted it on the main thread)

Secondly, my earnings from the past & amount I have in BTC doesn't prove anything.

It would be like one other user whom I will not name had made over \$500,000K apparently.

He showed a blockchain transaction of it which proves nothing of his services

I will drop you a PM with more details but to give you a rough idea.

The signals/calls are always given with enough time to place your trades.

(I give a Buy-zone within which you can place your trades. So, you always have enough time)

Most of my calls have a very good Risk/Reward ratio.

(Though if a trade is risky/volatile - I usually let everyone know in advance)

For example, from Feb 1st to Feb 10th, 2019 -

(12 Calls were provided, all of which gave good profits. Cumulatively, that's 122.84%)

#ICX - 22.94% Profit

#CLOAK - 9.35% Profit

#LUN - 10.56% Profit

#QKC - 18.67% Profit

#MTH - 3.58% Profit

#DOCK - 10.64% Profit

#RCN - 5.67% Profit

#DLT - 8.52% Profit

#QSP - 4.81% Profit

#KEY - 5.33% Profit

#KMD - 4.59% Profit

(Feb 16, 2019 09:07 PM)Unsologeek Wrote: [\[CITE\]](#) I was quite interested in this before I was part of a group of signals, but I did not have good results

As the saying goes, "Not all Men are created Equal."

Unlike other groups, which are known to create a scenario of Mini P&D.

(Where the owner's buy-in early and share the calls/signals later which creates an unfair scenario for their customers)

And then there are those who are charging \$20/50 for sharing calls - those are the shady ones.
(I mean come on... Sorting through assets and going through its data is not a small job, it's almost a full-time job and if someone is sharing something for that low, it means they are not sharing their own in-house calls. They are simply forwarding or copy-pasting from someone else)

I have 2 membership plans, to begin with where I specify that one can opt-in for premium calls/signals from 70+ reputed premium providers or follow and get my in-house calls for a lifetime membership and the other is a monthly plan.

Hence, I don't operate like that - my results speak for themselves. As I am not only creating a signals only group. I am trying to create a proper crypto community.

Where not only do I share my calls, I mentor and teach people who wish to learn how to trade alongside other things which I have planned. One of my private client who entrusted me with 2 BTC at the start of February, is super happy as within 16 days, I have taken this capital to over 4 BTC with almost 108% in gains. So, yea. I am sorry you had to go through such a sour & bad experience but my services and my community is nothing like that.

I did give out 2 vouch copies - currently not giving out any more.

If I had met you earlier, I'd have definitely given it to you without a doubt.

But Thank You for your interest and it humbles me that this took your interest.

So basically you only had 2 losses in the month of march if you dont include the running ones. Correct? thats pretty good. Also do you have a program that puts in the buys and sells for us by copying your account? or we have to do it manually?

littleswap - April 4, 2019, 10:39 am

The profits you have mentioned are by your in house trading signals or by premium signal groups???

For the month of March, yes.

Those were the two, excluding the running ones which we could have closed and taken profit at any time we wanted.

As for the program, I don't have anything at the moment but I do have multiple projects in development which ranges from a Website to an auto-trader bot which will work in the fashion of how you want. But they are long-term projects in development, will take some time to come into fruition.

As for now, you'll have to manually copy - it's easy and relatively takes 2-3 minutes once you get used to it. Which of course, I'll guide & mentor you on how to do it.

(Apr 4, 2019 10:39 AM)littleswap Wrote: [\[CITE\]](#) The profits you have mentioned are by your in house trading signals or by premium signal groups???

The above results are my own in-house trading calls. I don't showcase other premium signal groups results because they are not my own and I can't guarantee their results.

They have their own identity, I am trying to create mine.
