Thread: [Help me write this 30 bytes rewards](#)

mestic - January 13, 2019, 8:36 am

Hi guys, this might be one of the stupidest post you've seen but Im new to C# and need you help with this

"Write a program named GreenvilleMotto that displays the competition's motto, which is "The stars shine in Greenville." Edit the program so that it displays the motto surrounded by a border composed of asterisks."

Thanks lol

Will give 30 bytes for person who helps

SIM-3364521 - January 13, 2019, 8:59 am

```
string motto = "The starts shine in Greenville.";
StringBuilder display = new StringBuilder();
```

```
void printMotto(){
for(int i = 0; i < (motto.Length + 4); i++){
display.Append('*');
}
display.Append('\n* ');
display.Append(motto+" *\n");
for(int i = 0; i < (motto.Length + 4); i++){
display.Append('*');
}
display.Append('\n');
Console.Write(display.ToString());
}
```

Something like that havent tested it.

But you should be able to figure it out from here.

If not feel free to pm me.

Edit: changed code slightly. Also you have to make sure to call the method from your main.

Thank you! I sent you 35 Bytes!

SIM-3364521 - January 13, 2019, 1:22 pm

dude did you just paste this into a class and expect it to run just like that?

i just showed you how one could do it.

Didn't paste the whole class here so that's why you get errors.

-missing imports

-no class head

-no main
