You have mentioned that the customer will get a custom website design, but it is taken from Themeforest?

You are not selling online businesses.

You are selling graphics.

Big difference!

Also, I think you posted in the wrong section. This should be in the graphics marketplace.

You are wrong, im not selling graphics alone. Im selling a business bundle package, ill build your online business, create your marketing plan, create all graphical content for your business , this not graphics, i think you misunderstood the whole picture.

Also that is for custom requests, because ive been building businesses and selling them, ill give you an example of gmx-organic.pro which i sold yesterday, was a full online business for website traffic which had everything already built and its marketing plan
