Hey Can you also provide the approximate RAM estimates for XL, Large and medium RDP's in your post?

Also do we get 50% discount on the prices you mentioned?

Do you have Windows RDP's as well?

??? So what's the rate then? Your thread has pricing but it doesn't say what period of time that pricing encompasses, which leads many people including myself to believe the pricing on the OP is a one time payment, so which is it?

EDIT: I unfortunately have to change my opinion! I highly advise you against buying from this user...

The server worked for about 4-5 days and is not online anymore.
I've contacted him to restart it, he told me that he will do it as soon as he is back home and since then I didn't receive any respond.

I waited 3-4 days now and I've seen him online on his mobile as well as on his PC, but as soon as I contacted him, he turned offline.

Im going to try a chargeback through paypal now.. Dont really care about the money, but I don't want him to have it ^^

Can confirm, Op doesn't seem liking to answer people who got a server from them. I also asked him if he could restart it couple of days ago, but didnt remind him because i got it for free.
