**Nick (Name)** - January 15, 2019, 3:53 pm

Why setup a licensing system if it's going to be free? What kinda data are you tracking for the people using this?

**Goldmouth** - January 15, 2019, 3:55 pm

(Jan 15, 2019 04:53 PM)Nick (Name) Wrote: [\[CITE\]](#) Why setup a licensing system if it's going to be free? What kinda data are you tracking for the people using this?

Lic system lets me push updates like i said.

Based off Golden Eye Source, I will be updating and maintaining this rat for Educational purposes.

Download: <https://github.com/Hostah/SuBBus-RAT>

TUTORIAL:

Download RAT from GitHub for latest build, Then go to <https://pastebin.com/nkYkKE2T> and select a key that works. Register your account, Done Your RAT should open.

Your RAT should open:

good luck dude but just drop out the license if it's free there's no sense for it

**BigFatDogShit** - January 17, 2019, 4:04 am

(Jan 17, 2019 04:41 AM)blackcoder00 Wrote: [\[CITE\]](#) good luck dude but just drop out the license if it's free there's no sense for it  
is there any way for him to have a notification had to alert us there's a new update available or would that require license too? I don't imagine so.

I'd rather just go download the update myself, or get an alert.

**I.M.P** - January 17, 2019, 4:07 am

It automatically updates

**BigFatDogShit** - January 17, 2019, 4:13 am

(Jan 17, 2019 05:07 AM)Atroxcity Wrote: [\[CITE\]](#) It automatically updates

Well qroject says they need the licensing system to make it update automatically (but also did note they maybe they wanted to have a paid version one day that the license system would be good for), but other users brought up tracking concerns with system. and seems like people would rather have no auto-update + no license system.

**I.M.P** - January 17, 2019, 4:15 am

(Jan 17, 2019 05:13 AM)BigFatDogShit Wrote: [\[CITE\]](#) Well qroject says they need the licensing system to make it update automatically (but also did note they maybe they wanted to have a paid version one day that the license system would be good for), but other users brought up tracking concerns with system. and seems like people would rather have no auto-update + no license system.

Your not wrong and I can't say much :/ all I can say is I know how it worked before I know how it works now. It's not nearly as bad as Alles Auf Rot being able to litterally upload his stub to all your clients.

**BigFatDogShit** - January 17, 2019, 4:17 am

(Jan 17, 2019 05:15 AM)Atroxcity Wrote: [\[CITE\]](#) Your not wrong and I can't say much :/ all I can say is I know how it worked before I know how it works now. It's not nearly as bad as Alles Auf Rot being able to litterally upload his stub to all your clients.

I figure people smarter than I would look at the program or something and call qroject out with time if anything bad was occurring or could seem set-up to. qroject is "con"-cious. But Alles Auf Rot being able to do that? I've seen them on the forums as Golden Eye Developer I think, but was it through that they could do that?

**I.M.P** - January 17, 2019, 4:20 am

(Jan 17, 2019 05:17 AM)BigFatDogShit Wrote: [\[CITE\]](#) I figure people smarter than I would look at the program or something and call qroject out with time if anything bad was occurring or could seem set-up to. qroject is "con"-cious. Orcus works totally different than this RAT, plus ripping isnt what im looking to do. Im learning code as i go and i like this tool to practice on. Any other Coders that would like to hop on this project are more than welcome. At the end of the day its just another good tool for the community to enjoy. ?

Lmao its easy. Why would i ban licenses of people breaking my TOS without taking their clients? Sounds dumb right?

Also if people fucked around with me on discord etc i could have just fucked them up. And there was many smart guys trying to play on me

Everyone used it legally of course and it lasted 3 ~ weeks. Then there was only 2-3 sales a day and

i ended the project and released the source to a forum. Hostah aka. qroject was "smart" enough to download the files and release his very "own" rat lmao. For me it seems like he cant code for shit and still needs the attention on the costs of others.

If you're learning then why don't you go and do research about sockets and create your own software? Don't steal other people's work and put your own name to it, it's rather scummy, you didn't even bother to change the project's namespace or classes.

**adderalextra** - January 17, 2019, 10:44 am

holy shit, dont mind while a simple leech just takes hes share and is outtie, while the god likes devs argue over the client which can result in jail for many years.

this does require portforwarding correct?

any help for beginners would be appreciated. Im a father of 2, to monitor my kids just needed help on how to install on their device to keep them away from the crooks of the internet.

Thanks for the words, unfortunately not everyone here appreciates my work as much as you do. Programming the program took about 5 weeks until version 1.1.3 was sold here on Hackforums, after which I always provided step-by-step updates. To be able to create something like this you should of course have knowledge of a programming language.

**adderalextra** - January 17, 2019, 11:09 am

Sounds cool, thanks for the suggestions. been testing Lic server since one of the users was kind enough to point out a way to change the HWID so we have been playing with exploiting the Lic server, fun. my coding is slow but considering the naggin little things fixed, this project might take shape.

**AnUnknownEnemy** - January 26, 2019, 6:33 am

i'd like to get a key too if can, thanks :)

**Astonished** - January 26, 2019, 9:12 am

Would love a license key for this if possible

**Goldmouth** - January 26, 2019, 2:31 pm

Done, Version 1.0.3 released.

**R A B B** - January 26, 2019, 9:42 pm

High quality as hell! This is amazing, and extremely easy to use!

This thing looks and feels amazing, builder is quick and has a lot of useful features.

I am currently updating my VM and I am going to test it out on there to see if it connects up smoothly!

**Alles auf Rot** - January 27, 2019, 4:02 am

(Jan 26, 2019 03:31 PM)?HOSTAH? Wrote: [\[CITE\]](#) Done, Version 1.0.3 released.

well that would be interesting. maybe you can find a patch in windows 7 - remote cmd.

**Goldmouth** - January 27, 2019, 6:50 am

Oh, ok. No i have not. sorry about that.

**Alles auf Rot** - January 27, 2019, 1:44 pm

(Jan 27, 2019 01:54 PM)?HOSTAH? Wrote: [\[CITE\]](#) Oh, ok. No i have not. sorry about that. Okay, i will explain the problem, maybe you know some solution for it.

The Problem was, that the remote cmd wont send multi line output on Windows 7 (example netstat).

I think that the Problem could be at the "getShellInput()" Function, in the Stub Project, MainWorker.cs Line 1325. Maybe the Splitting between lines was different in win7 than in win 10. i was never able to fix it, idk. would be interesting if anyone is able to fix it.

**Threatening** - January 27, 2019, 1:54 pm

Looks good, replying for future updates.

**bongzytv** - January 27, 2019, 5:36 pm

Thank you will be trying this out now.

#### \*\*\*\*\* JIT Debugging \*\*\*\*\*

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Anyone else having this issue? Also when I hit continue and try to do the free license, it says it can't connect to the server

\*\*\*\*\* JIT Debugging \*\*\*\*\*

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>  
  <system.windows.forms jitDebugging="true" />  
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

==-- HOW TO FIX THIS?

(Jan 28, 2019 07:20 AM)xdesix Wrote: [\[CITE\]](#) Code See the end of this message for details on invoking just-in-time (JIT) debugging instead of this dialog box.

(Jan 28, 2019 07:31 AM)Atroxcity Wrote: [\[CITE\]](#) it wouldnt be "against the rules" but rather impossible? this seems like a waste of time too.

Impossible? Really?

**I.M.P** - January 28, 2019, 6:34 am

(Jan 28, 2019 07:31 AM)BigFatDogShit Wrote: [\[CITE\]](#) Impossible? Really?

are you going to make a bot designed to read answer questions and offer support? what exactly does it do? how are you going to code it to scan ever reply? Ask yourself that before you start thinking things can be done, sure its probably possible, but would take a lot of time for something so dumb ?

**BigFatDogShit** - January 28, 2019, 6:50 am

(Jan 28, 2019 07:34 AM)Atroxcity Wrote: [\[CITE\]](#) are you going to make a bot designed to read answer questions and offer support? what exactly does it do? how are you going to code it to scan ever reply? I think you could have a bot regularly check this webpage/thread for that specific error text or part of it that is shared between every user and reply to them one of the pre-existing responses OR only do so if they included keywords like that specific error text + the word help. From another HF account or their own, when the bot was replying it could leave a signature notifying it's the bot. But that's why I'd say a different account but I didn't know if Bot accounts were against HF rules when they're popular on Reddit.

and yes a lot of effort, for one thing they might have fixed in a new update. I was just saying. But I wasn't talking a full A.I. support bot lol.

**Alles auf Rot** - January 28, 2019, 10:59 am

(Feb 6, 2019 02:23 PM)daymoto Wrote: [\[CITE\]](#) Is there a setup tutorial available for this?  
Yup, [HERE](#).

**DecAnn** - February 6, 2019, 11:05 pm

what new changes are on SuBBus v1.0.5? ????

**Goldmouth** - February 24, 2019, 6:18 pm

(Feb 4, 2019 05:12 AM)fate1337 Wrote: [\[CITE\]](#) could you send me a licence please, your link is down?  
Done, Back online.

**Nasty779** - February 24, 2019, 9:21 pm

looks great op will try out!

**WhatTheLeak** - February 25, 2019, 12:51 am

Never mind the exception errors, just click "continue" and everything will still work.

**Goldmouth** - February 25, 2019, 8:26 am

(Feb 25, 2019 01:51 AM)WhatTheLeak Wrote: [\[CITE\]](#) Never mind the exception errors, just click "continue" and everything will still work.  
Yes, thnx. Is fixed now, will release new ver inna few. ?

**Fisher** - February 25, 2019, 10:00 am

Why are you not adding reverse proxy ?

**Goldmouth** - February 25, 2019, 10:26 am

(Feb 25, 2019 11:00 AM)Trojanisches Pferd Wrote: [\[CITE\]](#) Why are you not adding reverse proxy ?  
1. I'm only learning so im slow, I like robust things.

2. I'm so dam busy in life i haven't had time to pay much attention, This is my busy season.

3. Reverse proxy works just doesn't support SSL yet.

**Takehito Morokuzu** - February 25, 2019, 12:26 pm

Nice, I haven't tested yet but what has been changed since the last goldeneye release?

**Autist** - March 20, 2019, 5:17 pm

This new update really looks nice

**haugrud123** - March 20, 2019, 6:06 pm

license link dont work, will you fix it?

**Goldmouth** - March 20, 2019, 6:09 pm

(Mar 20, 2019 06:06 PM)haugrud123 Wrote: [\[CITE\]](#) license link dont work, will you fix it?

Works fine, Take this one. DKVY-JIXK-FCH5-92LE

**yanito** - March 20, 2019, 6:42 pm

Looks like a cool RAT do you plan on adding reverse proxy and this is .NET right?

**Goldmouth** - March 20, 2019, 7:05 pm

(Mar 20, 2019 06:42 PM)yanito Wrote: [\[CITE\]](#) Looks like a cool RAT do you plan on adding reverse proxy and this is .NET right?

It has Reverse proxy and yes .NET.

**yanito** - March 20, 2019, 7:08 pm

(Mar 20, 2019 07:05 PM)?HOSTAH? Wrote: [\[CITE\]](#) It has Reverse proxy and yes .NET.  
:O

(Mar 20, 2019 07:05 PM)?HOSTAH? Wrote: [\[CITE\]](#) It has Reverse proxy and yes .NET.  
What's the password to the zip friend? Or are you conning me?

(Mar 20, 2019 07:05 PM)?HOSTAH? Wrote: [\[CITE\]](#) It has Reverse proxy and yes .NET.  
Can you please give me the password to the zip? I'm not a low quality fellow, just like to troll is all!  
Please let me have the zip password and I will come back and bump your thread. Thanking ?

**naxster** - March 20, 2019, 10:36 pm

Not to be that guy, but didn't you remove the license key on this rat?

I think I downloaded the rat from your website where a license key wasn't required :/

**T0pi4ry** - March 20, 2019, 11:16 pm

RAR Password, If you don't mind ?

**Mr.DoomHead** - March 21, 2019, 5:10 am

Oh Boy :D

Love me some updates my dude! Appreciate all the time and effort you are throwing into this project

**Goldmouth** - March 21, 2019, 5:31 am

Thanks for showing love. highly appreciate it.

**Mercury** - March 21, 2019, 6:04 am

Not enough people produce freeware like this these days. Awesome project OP.

**WhatTheLeak** - March 21, 2019, 6:32 am

(Mar 21, 2019 06:04 AM)Raven Wrote: [\[CITE\]](#) Not enough people produce freeware like this these days. Awesome project OP.

Absolutely, NYAN-CAT does a good job at releasing freeware!

**0xK14n** - March 21, 2019, 7:19 pm

hi Mate, please send me license. looks interesting project. cheers

**Fisher** - March 22, 2019, 6:14 am

If you add reverse proxy then you rat is top notch hehe

**ZERO2SIX** - March 23, 2019, 6:54 am

Big vouch for ?HOSTAH?... keep up the good work bro

**D.N.A** - March 28, 2019, 4:38 am

rar pass . invitation code . License Keys !!! WTF

**ayocaine** - March 29, 2019, 10:35 am

How bout you come up with a fucking original name.

**Goldmouth** - March 29, 2019, 12:23 pm

(Mar 23, 2019 06:54 AM)Zero2Six Wrote: [\[CITE\]](#) Big vouch for ?HOSTAH?... keep up the good work bro

Thanks homie. I appreciate your kind words.

**GTrails** - March 29, 2019, 11:11 pm

Nice work buddy, Looks interesting, will definitely check it out buddy! ?

**Kokolol99** - March 30, 2019, 2:05 am

Lol, Rar has a password, Can't register to your site without an invite code. . .

**sonlason007** - March 30, 2019, 4:17 am

Cannot register without Invitation code..

**Vegeta Blue** - March 30, 2019, 11:00 am

Lol need rar password and invite code.

**H4AED** - March 30, 2019, 1:30 pm

Add HVNC or HRDP / Automatically detect and keylog once the client enters in sensitive details such as credit cards / bank accounts

Adding those two features would make this RAT worth buying.

**Goldmouth** - March 30, 2019, 4:51 pm

(Mar 30, 2019 01:30 PM)H4AED Wrote: [\[CITE\]](#) Add HVNC or HRDP / Automatically detect and keylog once the client enters in sensitive details such as credit cards / bank accounts

Why would you steal credit cards and bank accounts? That just makes you a POS person.

**Vegeta Blue** - March 30, 2019, 5:26 pm

(Mar 30, 2019 04:51 PM)?HOSTAH? Wrote: [\[CITE\]](#) Why would you steal credit cards and bank accounts? That just makes you a POS person.

No offense but I don't imagine you made a RAT expecting great people to use it.

**Goldmouth** - March 30, 2019, 6:35 pm

(Mar 30, 2019 05:26 PM)Vegeta Blue Wrote: [\[CITE\]](#) No offense but I don't imagine you made a RAT expecting great people to use it.

Sure, why not?

**sonlason007** - March 30, 2019, 10:30 pm

I need rar password and invitation code. pls invite me to join your discord.

**Partycrasher** - March 30, 2019, 10:49 pm

plese add Reverse Proxy / Trolling Tools( Were very funny ) :D  
thanks you

**SioVer2** - March 31, 2019, 3:18 am

Thanks so much for your contribution! Great tool, btw.

**H4AED** - March 31, 2019, 11:04 am

(Mar 30, 2019 04:51 PM)?HOSTAH? Wrote: [\[CITE\]](#) Why would you steal credit cards and bank accounts? That just makes you a POS person.

Doing something with the intent to cause emotional distress upon another, makes you a POS person. But doing something with the intent to make profit, without caring for the one that is hurt because of it, does not make you a POS person. Otherwise, everyone would be considered pieces of shit because most do not live just to appease others. So from another's perspective, they're selfish because they don't benefit them.

But to answer your question, you steal credit cards and bank accounts to either use them yourself or sell them online.

**Goldmouth** - March 31, 2019, 11:35 am

Taking peoples hard earned money, makes u a POS. its simple.

**sonlason007** - March 31, 2019, 8:34 pm

@?HOSTAH?,

I sent PM to you since and also post on this thread but you did not reply me, pls do so bro.
