Thread: [CyberSeal, Yakuza, cypherIT, or DarkEye Crypter, or some other?](#)

BigFatDogShit - January 16, 2019, 3:40 am

Curious on what to get, CyberSeal's dev apparently can be a dick to some people and Yazuka complicated.

-Lunar - January 16, 2019, 3:46 am

Im curious also. Im using Quasar the latest source posted on github.

I tried cyberseal it did not work at all for Quasar. Anybody got suggestions whats the best?

Exodus - January 16, 2019, 4:10 am

(Jan 16, 2019 04:40 AM)BigFatDogShit Wrote: [\[CITE\]](#) Curious on what to get, CyberSeal's dev apparently can be a dick to some people and Yazuka complicated.

Cyber is only a dick to retards.

BigFatDogShit - January 16, 2019, 4:18 am

(Jan 16, 2019 05:10 AM)Exodu\$ Wrote: [\[CITE\]](#) Cyber is only a dick to retards.

I don't think I'd have any reason for them to be a dick to me, but if there's an equivalent that's as good and no risk of that I'd want to go with that.

I also found these, could someone rank all the ones listed in this thread?

NTCrypt, STAGE 2, PolyPE, NightCrypt

TitanCrypt is apparently a "private" Crypts service

and FuckAv.xyz is to re-launch soon, but idk if that's a private individual Crypting service or not.

Fuzzynuts666 - January 17, 2019, 8:18 pm

Cyber is sketch. You ask too many questions and you are blacklisted. I asked if he took any other payment methods and was banned from his discord server. I would just as soon find someone less sketch.

I wasn't even pushy about it. I literally said "Hey mate. Do you take any other payments besides crypto? Crypto has too many fees associated with it."

Banned.

BigFatDogShit - January 17, 2019, 8:21 pm

Only other good one on here seems like DataProtection or something like that. Exploit offers better I assume I just gotta get a \$99 account.

are you retarded? i dont even have a discord server. post proof let`s see wtf are you talking about and see the real reason why you got blocked if you were

BigFatDogShit - January 18, 2019, 8:45 am

still very curious about this question people!

Menace 2 Society - January 19, 2019, 1:47 pm

Dude just try all the crypters that you named. I have tested allot of native crypters back in the day. Try them one by one. Most of them are shit. I used them for 2 months or less and throw them away. Untill I discover Yakuza.

BigFatDogShit - January 19, 2019, 1:48 pm

I'd have to buy some/if not all of them to try? the fuck? What were your run/scantimes with them all recently? What's the best?

smau - January 21, 2019, 1:58 am

just me my idea but I see cypherIT the best

HFGreyDeadpool - January 21, 2019, 7:47 am

(Jan 21, 2019 02:58 AM)smau Wrote: [\[CITE\]](#) just me my idea but I see cypherIT the best really? Well then I modify from my list, I had Cypherit in the B list but I'll put it in the A list now.

I think

A List:

CyberSeal. DataProtector, and Cypherit

(warning CyberSeal's dev is controversial for revoking offensive users' licenses)

B List:

DarkEye Crypter

Buying a crypter from a forum like Exploit instead of HackForums might be better/making your own crypter.

Buying a private crypter too if that's an option/you can always buy private crypts.

2018BALLER - January 21, 2019, 8:54 am

I would defently Go with Yakuza mate, i have been using it for three months now and f**kin Love it. I tried 4-5 diffrent crypters and never looked back after i found Yakuza. 0/26 & Update ever time it hits 2-3/26.

it not complated , there is super ICQ Chat and plenty of help in the chat and loads of demo veidos.

HFGreyDeadpool - January 21, 2019, 9:02 am

(Jan 21, 2019 08:47 AM)HFGreyDeadpool Wrote: [\[CITE\]](#) ~snip~

i`m controversial for revoking people licenses? ?

funny shit

if i banned someone was because he broke my tos and I always ban temporary and try to solve it friendly with the customer.If he becomes a moron about it (ex:threatening, sales trashing etc)instead of admitting his mistake then it turns from temp to permanent. I am always opened to solving things friendly and being a reasonable guy.

Only persons who were ban permanently were customers who scanned on virustotal deepsite the fact that the 1st warning when you open the crypter it tells you not to scan there, 1st warnings from my tutorial doing the same and i even tell them personally where to scan if they buy manually or tell me after they bought. Others banned permanently where those threatening/trying to crack it.

I`m not tryin to get you as a customer here i couldn't care less what crypter you buy but get your shit straight

Listen, you are controversial by definition. Please understand that.

If you want anything edited or taken down lmk, I thought I wasn't sales trashing just informing as nicely as I could that a portion of the community feels a certain way towards you and previous cases exist in history of their being a situation with a customer like this.

opinions are subjective but you should try having a bigger look than 2-3 angry banned customers mouths. Of course you will say i'm a rude with customers if you are one of the customers that uses google translate and make me waste 2 hours for a 5min problem because you can't understand doing some basic computer tasks and have the IQ of a monkey. I mean if you need support and you are incapable of downloading the crypter for a simple file sharing website that hundreds could with no problems, you are likely to be insulted at some point when my patience runs out. Happily, this represents less than 10% of my customers. About 70% never need support as my tutorial is so retard friendly that you absolutely need to be brain dead to tell me "i dont understand anything".

Whats funny is that most of this support needing customers are those who havent bothered watching my tutorial and think support is about sittin back and relax while i do all the work for them so again if you tell me you've watched then i ask you something from the 1st minute of it that is big and clear that is written in multiple places and you tell me you have no idea, it is likely to get insulted.

Which 2 just curious

puirisher - January 23, 2019, 8:20 am

I have used many crypters but didn't get good results until i finally subscribe to Yakuza crypter with 0/26 detections and regular stub update, therefore i recommend it for everyone to try and i bet that you will never want to use other crypter again.

Also there is ICQ group chat that you can always ask for help but not advert cos you will get ban :)

100% vouch for people choice (Yakuza crypter)

cheap

reliable

excellent support

0/33 detection's

Regular update

Tony82 - January 31, 2019, 5:21 pm

I can recommend a site of a Russian to do it FUD

Nnm3398 - February 5, 2019, 1:52 am

???? ?? ???????????? Yakuza Crypter?

d4rkl4b - February 12, 2019, 1:18 pm

So after weeks of trying Yakuza with warzone still yet not a good report to say.

If you experience different with yakuza please share

Mercury - February 12, 2019, 8:38 pm

I've always liked No\$feratus products. Cyber seal looks fantastic though. Its obvious he put alot of

time and effort into his product.

jameswatt17 - February 13, 2019, 4:26 am

cypherIT is cool but their output is large

d4rkl4b - February 14, 2019, 7:59 am

[Note:]

Warzone is a nice product but getting a crypter to work with it is the issue

Yakuza so have as been more than reliable with native file e.g #

with multiple method of encrypting your file i will say Yakuza for your native files .

Sorry but I aint an asshole..Just asking if Yakuza is compatible with webmonitor thats all

simone91 - March 1, 2019, 1:58 am

the support of cyberseal is very rude, I lost the data, despite having proof of payment with all the conversations, did not want to give me the username and blocked me on all channels, also it does not always work, depends on the updates

Cyber Coder - March 1, 2019, 2:47 am

(Mar 1, 2019 02:58 AM)simone91 Wrote: [\[CITE\]](#) the support of cyberseal is very rude, I lost the data, despite having proof of payment with all the conversations, did not want to give me the username and blocked me on all channels, also it does not always work, depends on the updates you mean the username THAT YOU WERE ASKED TO CREATE TO MATCH YOUR HF USERNAME that you didn't give a damn?

or the username that the crypter told you when you logged in TO WRITE IT DOWN IF YOU KNOW YOURSELF WITH SHORT MEMORY that you also didn't give a damn??

my TOS clearly state that you if you lose your account you will not get a new one and the crypter has password recovery.

and yeah sure , i release 1 update working, then next not working, and so on ? great logic

in other news you can kiss my white ass, dumb nigerian, for not telling the full story ?

simone91 - March 1, 2019, 3:09 am

1 - in the time of need you do not provide assistance, the files were never fud or some functions did not work (with sentinel)

2 - you were always right, after a long time that I did not use more cyber I had problems with the PC and I lost the data, you did not want to give me the account despite all the evidence of conversations and payments made, ok was in the tos, but for humility you had to provide me with the password again (I remember only the username), just because there was proof of payment, with this I close that you're good only to give negative comments on the hf profiles, hello hello

YAK_CODER - March 2, 2019, 12:11 pm

i think this thread is useless

by the way my best coder is Cyber Coder

he is legend and high level coder for me so kindly stop useless shit here

Hello people, please what's the best # and nanocore crypter that's fud and good

WhatTheLeak - March 7, 2019, 6:52 am

(Mar 7, 2019 12:23 AM)mrlaxy Wrote: [\[CITE\]](#) Hello people, please what's the best # and nanocore crypter that's fud and good

Any native free crypter with a good private stub, it's not the crypter which should be good, but the

stub which is in use.

Exodus - March 7, 2019, 6:55 am

I have to agree with CyberSeal I have dealt with him before. I he the most happy go lucky guy no he is not but does he ban without a good reason no. He has a good reason. The part about banning you cuz you asked about payment is a lie because I did the same thing. Don't sales trash because you don't understand the crypter and got banned for good reason if at all.

(Jan 16, 2019 04:46 AM)-Lunar Wrote: [\[CITE\]](#) Im curious also. Im using Quasar the latest source posted on github.
