DataBiz Provide Niche-Based Clean Email Lists For Email Marketing Purposes.

The Emails are collected manually from Ecom Websites & News Android App with full consent of users who subscribed to the niche they have interest in.

NICHES AVAILABLE :

- Education
- Health & Fitness
- Internet Marketing
- Technology
- Finance And Business
- Beauty & Fashion
- Dating And Romance

We also have other custom niches like (fortnite - league of legends - runescape - football teams - artists etc..)

These lists may take some time to be collected and the prices are different from the prices below.

I'm interested if its as advertised.

Which countries are the people from?

And are you able in any way to verify how you got these emails?

We got world wide and UK/CANADA And USA data

The data is collected by our team, as I said it is collected from mobile apps and ecom website, and we are sorry we cant show you anything related to the collection process for security and privacy reasons.

Before buying, could we run a test campaign to one of my websites and see what the traffic is like

and the open rate of the emails? I'll be then able to verify that they are indeed USA/UK/Canada.

We dont do bulk emails and things like that, we only sell data, you can buy a small amount and test it by yourself, and I guarantee that you will buy more :D pm me if you are interested :)
