I'm in the same boat. You should probably post a portfolio if you're trying to get work here though.

VirtualFrost - January 17, 2019, 1:07 am

If you are seeking for paid positions/some sort of payment for any work you do, you'd need to post in the marketplace. If you are just posting to work for free I hope you get some good opportunities then.

Free looking to partner up with someone and build somethings that have never been done. :)
