Do you still need help? I don't really have time to do a 1 on 1 walkthrough man, I've done it before and people just never stop asking me questions instead of going out and trying to figure it out on their own. Everything I said can be easily found in Gammadyne settings. Most SMTPs if from a good source will have SSL/TLS capability.

**sampark1471** - January 19, 2019, 2:37 pm

yes I am still interested , add me up .
