Thread: [Selling All my Methods & Packs \[6 years+ of experience\]](#)

sh4dow.gg - January 18, 2019, 3:02 am

Hi, I'm selling all my methods&packs for ewhoring + tutorials for CPA. I've been in this game for over 6 years. I decided to stop ewhoring as I've a full time job now after graduating from uni + have other responsibilities. I can't guarantee that you will make \$1000/day using my methods but I'm pretty sure my methods are way better than these BS ebooks sold here (for atleast what I've seen, most of them are useless). All I can say is I paid off my student loans, bought rolex watch (waste of money I know but been my dream for a long time) and some hardware. You can definitely make a few thousand \$ a month using these methods.

Not really looking to make money, I just feel like I don't want my methods to be forgotten and I think I should give them to somebody, so I'm selling them just for symbolic \$15. This is probably my last post on this forum. I don't give away vouch copies.

Also to make it clear - all these methods are made by me (only shared with a few guys) & work worldwide + private packs made by me as well (including all you need).

[Buy here with Bitcoin \(rocketr\)](#) or send me an AGC through PM if you're not a fan of btc

?

Hi,

What makes your service special and not like all the other sellers ?
