Thread: [100% Bulletproof Dynamic DNS Services \(DDNS\)](#)

Angelis - January 18, 2019, 5:20 am

[2x DDNS Host Package](#)
[2x Private Domain Package](#)

Service originally setup and configured by Armada, Now managed by myself.
Existing Armada Secure DNS customers may contact me regarding problems for previously purchased services.

Hello Friend,

Has my DNS Issue we talked about been resolved?? Its been 3-4 Days since we talked.

Please solve my issue. Your PM seems to be Disabled I tried to PM you.

Thanx and Regards.

Honest question:

Whats the use of such DNS service?

JasperRed - January 25, 2019, 1:23 am

If you dont know then you dont need to know.

elta29 - February 10, 2019, 8:59 pm

i can use your service for phising ?

Angelis - February 10, 2019, 9:31 pm

I mean, technically you could, but thats a lot of work to send off spam mail. Id just buy a shell...

sandiegoace - February 14, 2019, 2:40 am

I would like to configure my netwire with this dns.
How is it better than noip?
how secured is it?
can it be used for ratting?

Well, lets start with the fact No-IP is owned my Microsoft.
- They monitor, Honey pot, report and ban people.

My host domains are registered where spamhaus and other agency take down notices are not honored.

Further the services does not log or report activity.

This service was originally developed as a replacement for DuckDNS after they deployed a Honeypot system to their network and people were loosing their hosts for their Remote tools. So yes, this service is ideal for Remote Administrative tools.
