Thread: [Best RAT 2019](#)

drDREAD - January 18, 2019, 11:50 am

Hey Guys,

It's been a while since I have been on here, the last RAT I purchased was Nanocore and Luminosity Link, both of which are either not supported or won't let me install (idk at this point, says my purchase password is incorrect, I purchased a lifetime code)

Is there anything similar? Or better?

Let me know what you guys think

Exodus - January 18, 2019, 11:52 am

Nanocore and Lumi are both dead RATs.

Orcus isn't being updated by the dev no more. and I don't know but I read someone say it hasn't been since 2017.

can someone just give a straight answer, i am in need of this too

Zulu149er - December 8, 2019, 8:01 am

1. AsyncRAT

2. QuasarRAT

These what I use.

ubernewb - December 8, 2019, 12:21 pm

Not sure about the effectiveness of orcus, but I did stumble across this article.

[apparently I can't post links because I'm a newb but a google search of the following should produce the article about the developer of orcus being criminally charged]

talk about resurecting a dead thread; but i'm looking for a solid answer to this question as well.

Been looking at WebMonitor PC, but if anyone has other suggestions I'm very interested! I'm probably gonna buy one this week.

OfficialLemon - December 8, 2019, 4:18 pm

There is not a rat that is "better" than another in any way.

It all comes to personal preferences, and what you are going to use it for.

ubernewb - December 8, 2019, 6:47 pm

Wow...didn't even notice this thread was a year old. Oh well...pretty sure someone recommended webmonitor if that makes you feel any better about it.

The features for that warzone rat, or whatever it is advertised in banners here, seem pretty good but it seems a tad pricey. That said, its the only pricing that I've looked at for a RAT so I could be totally off-base since I don't have a point of reference.

NYANxCAT - December 9, 2019, 12:20 pm

I will give you an advice, don't buy, use free RAT.

I assume that you imply by rather using a free RAT, that the importance lays more upon a good crypter. Or am I misunderstanding you here?

Thank you for all the tools you release btw. I am a huge fan!

Yes, Absolutely right, Use free RAT but you may need to buy Good crypter, especially this NyanxCat has best crypter to buy...Some people search RAT with many functions and come with lots of Plugins....hmmmmm useless and easily detected....for now Async RAT, LIME RAT, Revenge RAT are good enough for free...

Well not only that, but in many cases the rat owner gets popped eventually, which leads to the many patrons' details to get leaked. This has happened before and many rat users have been arrested after a tool was investigated by the feds. Free rats, on the other hand, have basically the same features and lack this fatal flaw. If u want good cracked rats that are clean go to connect-trojan. :)
