Thread: [Get multiple picture from database](#)

adenfr - January 18, 2019, 2:23 pm

hello guys

i'm want to ask if there is a possibility to get top 10 product image (high saling) from database (C# SQLServer)
it try with that with another exemple without image
here is my table

but i want to get the top 10 and link theme with picturebox or Shelf/Grid View or Shelf Item in dashboard as example

any help??

+Haze - January 18, 2019, 6:04 pm

What on earth are you talking about?

What ???

StarZ - January 19, 2019, 1:08 am

Hold on, I speak retard, Allow me to translate.

(Jan 18, 2019 03:23 PM)adenfr Wrote: [\[CITE\]](#) Sup niggaz,

I'm tryna get the top 10 (highest selling) product pix from a db (C# SQLServer, ya feel me?)

I wanna line dem niggaz up in a GridView dashboard like thing naamsayin?

Deuces niggaz.

Add a Column for 'amountSold', int.

Query:

Code SELECT * FROM `TableName` ORDER BY `amountSold` DESC;

Then add the images (StoreProImage) to your control along with whatever other data you wish.

is not a solution bro

amountSold =SUM(Qte) and i already did it and in your query you not selecting any image !!!

can you provide more exemple

I'm selecting EVERYTHING (all values) from the table sorting by the value of amountSold. Just grab the image and put it in the control. Also may want to add a limit of 10 to the statement. SQL Isn't the hardest thing to learn. Study up more I feel most people on this forum haven't used it in conjunction with a Desktop Application.
