Thread: [Need 2 beta testers](#)

**I.M.P** - January 18, 2019, 4:57 pm

I recently made a coming soon thread about a windows defender exploit, I already had 1 tester in mind

I need 2, pm me for the exploit.

It's a simple exe and yes the exe is the exploit. Do not run it on your host machine.

This is a beta and a working but incomplete, please do not leak or share, looking for upgraded and TRUSTED members to test. Best of luck to ya ?

I can test it on my main machine, let me know.

Ubuntu 18.10, it can run exe no problem.

You have windows defender on Ubuntu? ? something doesn't seem right here

We still need 1 more tester! :)
