Thread: [Nano Worm || Native || 4kb stub || FUD Scantime & Runtime || Unkillable presistance](#)

exploit.exe - January 19, 2019, 11:22 pm

What is Nano Worm? it is a worm coded in C/ASM that spreads through a lot of things and offers exclusive features not seen around here!

I work hard keeping this updated!

Right now it is FUD even RUNTIME while maintaining a 4kb file size without icon.

Features

USB Spread.

Youtube Spread (Uses their youtube account to like your video, subscribe to you, and comment whatever you want (can use multiple comments)

Twitter Spread with custom messages.

Facebook Spread with custom messages.

Gmail Spread (Will be done by 1/21/2019)

{EXCLUSIVE} Steam Spread with custom message

{EXCLUSIVE} Skype and Discord Spread with custom message

{Coming soon: XMPP Spread}

Firewall bypass.

Low resource usage.

Supports both x86 and x64 Windows OS (from XP to 10)

Full unicode support.

Beautiful panel for controlling bots, easy to configure comments/messages and everything.

Unkillable process persistence.

Startup.

Anti-Emulation.

Anti-Debug.

Visit web page.

File binder.

Stable and lightning fast.

Stub size - 4kb

Download/execute

Update/Uninstall client

Advanced password recovery.

Cookie recovery.

Reverse Proxy.

UAC Bypass which works on Windows 7/8/10.

RUNTIME SCAN

For the first 2 buyers, you will get the displayed price then it will go up to \$139.99, this is to get more reviews. Click here - [Purchase for \\$139.99 \\$49.99](#)

Functionality - 10/10 (Incredibly fast and stable, uploads and executes files nearly instantly and password recovery is impressive, persistence is near impossible to get rid of.)

Ease of Use - 10/10 (Great GUI I love it, setting up all the custom comments for youtube spreading, steam etc is very easy and comes with comments you can use!)

Support - 10/10 (Very responsive and on the ball)

Price - 10/10 (\$50 is nothing for lifetime use, honestly a steal!)

Sending logs to a gmail account, been working perfect, nice clean logs.

FTP also works well but I personally do not like to keep those logs on an FTP.

I can definitely recommend this product 100%, great for holding a lot of bots, great functions to make \$\$\$ never seen something like Nano-Worm on hackforums.

CAUTION TO ALL MEMBERS POSSIBLE CUSTOMERS

This offer is surrounded with Scamy Conductions.

This "Vouch" from [Meow](#) just points to completely other Post from Meow.

Which makes me believe that it is probably faked so ill already Contacted Meow and yeah well see if its legit soon.

UPDATE: Meow declines that he ever reviewed this Product.

As Pointed out by @Dervie and some other he is Offering a small Bytes transaction for when someone marks the Thread with 5 stars.

after reading this thread <https://hackforums.net/showthread.php?tid=5931574> it looks like he has just never paid someone.

Note: Nice try idiot , even the screenshot u take it from CPU/GPU miner.

(Jan 20, 2019 03:33 PM)Hexecutor Wrote: [\[CITE\]](#) Just wondering if it was all true because as stated above some functionalities seem nearly impossible being totally fud scan and runtime.

It looks very clearly to me That this Offering is a Scam but ill Wait for Meow's Answer before i Report it

UPDATE: Based on the lie from the Author about the Review of Meow of his Product it looks like he is obviously Scamming

Therefore dont deal with him

How about a Vouch Copy for me .

FriendZone - January 20, 2019, 6:09 am

Can I have a Vouch Copy? I will use it on my VM to test only detection and some functions

Then I will write a complete review

:)

Be careful, this user might potentially be planning a large scam. All their 5-star thread ratings are from below (he is not paying anyone their bytes, he's just getting people to 5-star so he can quickly scam).

"Unkillable persistence" is a most curious claim, can this be demonstrated?

I am more than sure I will be able to write a killer for this persistence with ease.

A FUD worm capable of spreading through USB being sold for \$49.99 ??

Either you are one of the greatest elite hacker in the world who does not understand how much valuable an actual FUD worm that can spread through USB is (not even joking, you can comfortable get over 1.5 million for something like this).

Or a more likely scenario, 99.99% of what is being claimed here is completely false and this is just a attempt to scam people.

I for one, don't buy this AT ALL.

If i could get a vouch copy that would be goochi !

i like the idea !
