Thread: [Add Bytes Balance to Different Pages](#)

Leroy Jethro Gibbs - January 21, 2019, 12:48 am

So my recommendation is simple. Instead of having your bytes balance on just the profile like I've seen so far, what if you put it within the navigation bar and/or within your user control panel.

Nav:

Spoiler [\(Click to View\)](#)

UserCP:

Spoiler [\(Click to View\)](#)

Just an idea. Let me know what you think.

Eagle 95 - January 21, 2019, 3:28 am

I'm not sure about the nav bar but UCP is fine. :)

Leroy Jethro Gibbs - January 21, 2019, 1:48 pm

So about my suggestion.....

SoulZeh - January 21, 2019, 1:49 pm

Yea, I'm also not a big fan of it being at the nav bar but the usercp seems like it would be pretty cool.

Xerotic - January 21, 2019, 1:53 pm

UserCP is the same number of clicks away as your profile is on every single page. What is the difference. ?

Leroy Jethro Gibbs - January 21, 2019, 1:58 pm

(Jan 21, 2019 02:53 PM)Xerotic Wrote: [\[CITE\]](#) UserCP is the same number of clicks away as your profile is on every single page. What is the difference. ?

I never really go to my profile. I always use my UserCP. I'm sure I'm not the only one.

So start clicking your username instead of User CP?

Leroy Jethro Gibbs - January 22, 2019, 5:05 am

So put bytes somewhere I can just glance at and see my balance? Its literally one line of code to add it.

Nachfolger - January 22, 2019, 5:08 am

I think having it in the navbar would be beneficial, since it's so easily found, but I would use adblock to get rid of it. The navbar is already so filled.

As for the CP, there's obviously no reason why it couldn't be there (imo).

My main thing is I feel like I'm hunting when I look at my bytes. I would like to just notice them. Not actually have to go look for them. UserCP is something I always use and I know how the templates work. So it shouldn't take more than a few minutes to add. Hopefully the big boss says yeah, I'll give you your bytes balance.

nah you're the only one.

Effexion - January 22, 2019, 5:38 am

li quite agree. At the mintue I go and check an old post to see how many I have. Would be much handier up there for quick reference.

Lmao. I ain't trying to get closed. I seen some of those oldfags that got closed for it.

Anyways on topic, its useful. To me.....

webdev77 - January 22, 2019, 11:07 am

In all fairness, the more clutter that is added, the less mobile friendly the site becomes. I'm not sure that this suggestion is truly beneficial in any regard except to fix your complete laziness.

That. And OP should also read this thread <https://hackforums.net/showthread.php?tid=5382950>

Layout suggestions are not allowed.

(Jan 22, 2019 06:05 AM)Leroy Jethro Gibbs Wrote: [\[CITE\]](#) So put bytes somewhere I can just glance at and see my balance? Its literally one line of code to add it.

Make your own forum and design it the way you want.. You can't be serious saying "Put bytes somewhere I can just see". The self-entitlement is really high.

How am I self-entitled? You are correct about the layout suggestion though.

Omniscient - January 22, 2019, 3:34 pm

Actually you bring up an interesting point and Xerotic and I have a concept for the future.

Leroy Jethro Gibbs - January 23, 2019, 5:27 am

I can see how it would be seen as laziness but I actually use mobile and constantly see the usercp. I think it would be useful somewhere you could see on any page that way when you are playing the bytes games you know what your balance is. Just my opinion.

Also closing the thread again

Elitas - January 23, 2019, 8:23 am

I agree with Xerotic. I don't really see the benefit of this. Your bytes are already shown on all your posts, on your profile and in a few other places.

As for the 'one line of code'. Not 100% sure if that's accurate, as I don't know if the UserCP templates can access the user byte variable.

Omniscient - January 23, 2019, 9:36 am

So here is part of the discussion I was having with Xerotic.

Basically we are adding more elements to HF such as the upcoming game and crews. We now have multiple control panels. It's not all in one place but obtaining that is going to be very difficult. But I do have some ideas on how we can make viewing your own profile easier and with the information you'll need.
