Thread: [Kali Linux OpenVPN Error](#)

TechnicalRich - January 21, 2019, 5:45 pm

Hello, I'm trying to set up OpenVPN on my Kali Linux, I'm using VirtualBox, I tried installing OpenVPN through vpnbook.com and whenever I try to connect it gives me some errors.

```
Code openvpn --config vpnbook-fr1-tcp80.ovpn
```

```
Mon Jan 21 20:36:29 2019 OpenVPN 2.4.6 i686-pc-linux-gnu [SSL (OpenSSL)] [LZO] [LZ4]

```

What's causing this?

TechnicalRich - January 22, 2019, 12:15 am

(Jan 22, 2019 12:17 AM)jeremyratte Wrote: [\[CITE\]](#) It looks like you are connecting to VPN on port 80 and it doesn't seem right, because usually OpenVPN servers works on another port - 1194. Probably your connection at port 80 is resetting because no openvpn server listens on it. But it's only suggestion.

Hmm, I think I tried using a 1194 port file as well but I got the same error, I'm not completely sure though, I will test it again today.

How did you manage to get it solved? Or did it get solved by itself?

TechnicalRich - *January 25, 2019, 9:22 pm*

Fixed it by installing some network related packages that I apparently didn't have.
