Hello,

I have created a Windows Instance using GCloud. but I cant Connect to the Instance using RDP.

Please help me to sort this out

It doesn't connects instantly, you need to wait like 3-5 minutes after creation to connect to it.
Just copy the ip to connect to it using mstsc service.

Microsoft remote desktop connection service lol

window key + R and type "mstsc" and enter :D.

I did that, but every time I get an error like this

Remote desktop cant connect to the remote computer

Do I need to change some configurations
