Hello guys,

today, I bought Sentinel keylogger, it's my first time getting into this kind of stuff, so I wanted to ask you, can you see full keyboard logs and it does send me only mouse logs, even when the password and username is filled. btw I got the auto login passwords, so I don't know what is the problem. thx 4 your time, and pls someone respond ?

After a week of shopping around, I believe this is the KL I will be going for. Seems to have good reviews, and features. My only other question is, what is the best Crypter for this KL? I am really only concerned about FUD at this point as it seems this KL covers all the bases.
