Thread: [HOW TO GET 5000 fan for free on Facebook !](#)

Hello, this method is very simple and effective :

Create a facebook account or buy one, put some photo of a girl (it has to be realistic) , once done, join some group with a lot of men (Game, car.. anything) and post something like " Hey, anyone can help me to finish this game ? please send me a friend request"
Or " anyone can help me buy a new car ? "

You will receive a lot of friend request , once you reach 5000 friends,convert your facebook profil into fan page, all your friends will automaticly like your fan page
When you convert your profil into fan page, facebook convet your friend in fan /like
