To be honest it's nothing special, just something for me to start but I'd like to hear from you guys what do you think about my first work.

Feel free to give me some suggestions, I'll be adding some more things tomorrow anyway(probably a fire from dragon's mouth and a "spell" shield from wizard, and some better shadows).

In case any of you start talking how shit the dragon(quality) is welp, that's the best one I could find with the "side view" so yeah.. feelsbadman.

Looks good, only thing i am kinda bothered about is the rock hes standing on. The edges could blend a little better, try playing around with drop shadow and types of blending modes.
