Thread: [ScanSmart Online AV Multi Scanner || FREE || 10 MAJOR AVS || NO Distribute](#)

Tigatron - January 26, 2019, 7:57 pm

Hey guys, sorry about the downtime on the ScanSmart, I've been super busy in a new position at work and I hadn't had that much free time. Most of my free time the last couple months has been on weaponizing a new generation of exploits for Office Harassment V2.0, but alas the lack of reliable scanners has still been a giant pain in the ass, so now that I finally have some extra time in my days I thought I would rewrite the whole scan engine for a real 1.0 release. Additional scanners will be added over the next couple weeks or so. Please file bug reports either here or email me at Tigatron1806@protonmail.com

<http://scan.tigatron.pw>

Cyber86 - January 27, 2019, 12:46 am

I recommend protonmail.ch for your email, feds have gone after scan sites before, best to be safe.

Tigatron - January 27, 2019, 6:32 am

Thanks I'll look into that! I live in a country with no extradition treaty with the US so the whole fed problem doesn't effect me personally but like you said better to be safe!

Takehito Morokuzu - January 27, 2019, 8:00 am

No distribute, right? Does this also work with bat files and files that are not exe?

Tigatron - January 27, 2019, 8:46 am

Thats correct! Non-Distributing and works with any file type.....when it's working lol I'm just sorting out server infrastructure at the moment my web development skills are admittedly a little rusty.

Tigatron - January 28, 2019, 10:27 am

Just a heads up server will be down for the next couple hours for upgrading, adding a couple new requested features!

Takehito Morokuzu - January 28, 2019, 11:28 am

(Jan 28, 2019 11:27 AM)Tigatron Wrote: [\[CITE\]](#) Just a heads up server will be down for the next couple hours for upgrading, adding a couple new requested features!

I tested it yesterday, I would suggest merging AVG and AVAST into one (they are identical products) and also improving the speed, and adding more AV's to the list.

So far so good though my friend ?

Tigatron - January 29, 2019, 6:04 pm

New update is live! On top of slightly improved scanning speed, I added the following user requested features:

- It's an actual full UI now(you guys didn't like the plain white page apparently? :P)
- File size limits set to 2mb currently.
- Added file size in scan report in bytes.

-Added permanent share links in both .html and .jpg format, here's an example of one I got from a scan:

More updates on the way!

PerfectStorm - January 29, 2019, 7:38 pm

Cool checking this out as we speak. Thanks for sharing it.

n0\$3ratu\$ - January 30, 2019, 8:16 pm

This looks cool Tigraton.

I hope you will add more av's soon.

Spoiler ([Click to View](#))

Tigatron - January 31, 2019, 8:10 pm

Thanks for the support guys! If anyone has any specific scanners/features theyd like me to add let know.

72hrs of constant heavy load of scans and my cluster seems to not be on fire!

I think all requested features are implemented now (If I missed your PM sorry! send me another I get busy multitasking)

So now that I have a solid AV scanner covering all the major antivirus's, my work on Office Harassment 2 should finish up fairly soon, that was the main thing holding me back.

I was really holding out hope someone else would just start consistently maintaining a scanner so I didn't have to make one, but here we are. Enjoy!

*****W0lf***** - February 3, 2019, 11:51 pm

Thanks for sharing it, hope you will add more av's soon!

k1ng0fn0th1ng - February 9, 2019, 9:20 am

Is it scantime or runtime scanner? sorry if it's obvious for others but not for me.

Takehito Morokuzu - February 9, 2019, 4:22 pm

(Feb 9, 2019 10:20 AM)k1ng0fn0th1ng Wrote: ([CITE](#)) Is it scantime or runtime scanner? sorry if it's obvious for others but not for me.

Scantime. All it needs IMO is a list of more AVs.

Tigatron - February 13, 2019, 5:45 pm

Sorry for the late reply, as yuno said it's a scantime scanner, I don't have the required available infrastructure for a runtime scanner. Thanks for your interest!

PS. ScanSmart will be down for about an hour while I perform some networking upgrades.

Tigatron - February 18, 2019, 3:25 pm

Heads up folks,

I'm currently busy this morning with other work, as well as monitoring all the new users coming into <https://pay.tigatron.pw>

BUT

at some point in the next 24hrs ill be moving ScanSmart to <https://scan.tigatron.pw>

It just makes sense since I'm running multiple web services now to give them their own

subdomains.

So if you goto <https://www.tigatron.pw> and its like a test landing page, do not panic. Have a great day guys!

OfficialLemon - February 20, 2019, 10:50 am

What is the size limit of the files you can upload?

I can't seem to scan any stubs that have something binded to it.

nullvo1d - February 21, 2019, 9:58 pm

good work man pm me interested in some discussion..

timboleik - March 4, 2019, 7:00 am

Thanks for sharing it,hope you will add more av's soon!

down

Tigatron - March 11, 2019, 7:21 pm

Yes sorry there may be some short intermittent down times over the next day or so as I'm testing the new api integration with Office Harassment 2, good news is OH2 is basically done, and other then working on addition exploits to add into it, my next item on the to-do list is adding additional scanners for ScanSmart. If there are any in particular people would like me to start with, please let me know!

EDIT: PaySmarter should be unaffected by any of this upgrade process.

Transporter007 - March 13, 2019, 2:27 am

Looks great.

Takehito Morokuzu - March 13, 2019, 10:25 am

Hi, the website is down. Can you fix it? Thanks

Tigatron - March 13, 2019, 10:54 am

I apologize there may be intermittent timeouts on scans. I currently have 16 TensorFlow ML Agents training themselves on various obfuscation techniques on office exploits(used for the refudding component of Office Harassment 2), and they are absolutely hammering ScanSmart to test the results of their new obfuscation abstractions.

Software infrastructure on OH2 is done and the ML agents have solved AV evasion a few different ways already, but they are not constantly producing perfect results, so that's what I'm working on, and should (knock on wood) be done today and my ML agents can take a good long break until theyre needed again, by which point I'll likely set up an additional scan farm just for the AI.

TLDR: ScanSmart suffering AI Apocalypse , try the scan again if you have issues.

Access - March 14, 2019, 2:53 am

Website don't work for me, you too ? Any update soon?

Tigatron - March 14, 2019, 1:46 pm

Machine learning agents have all finished, ScanSmart has resumed full operational capacity.

Sorry for any issues folks, but the scan api was originally built just for my ML training, it was only after the fact I realized I could open it up as a webservice.

Tigatron - March 22, 2019, 10:06 am

UPDATE:

- Adding more scanners shortly, starting likely with defender.

- Using proceeds from OH2, ScanSmart has been upgraded to a higher tier cloud infrastructure to deal with the volume of scans (23000 scans/month, or 766 scans/day, or 31.9 scans/hour on average). So if anyone is still receiving Cloudflare timeouts please let me know because with what I'm paying this should not happen.

Thanks again for all the support folks!

EDIT: Sorry quick restart, NOW the update is live! lol

Hopsin - March 22, 2019, 3:26 pm

Nice, hopefully you will add more scanners. <https://scan.tigatron.pw/>

Here is a scan report from a test file.

<https://scan.tigatron.pw/static/scans/38R1BLL8/scanresults.html>

Tigatron - April 4, 2019, 4:41 pm

ScanSmart Will be going down for an hour or two of maintenance, sorry for any inconvenience!

EDIT: Maintenance is all finished, sorry about that folks! Setting up support to enable additional AVs in the next week or so.

PusherClear - May 3, 2019, 1:13 am

sometimes its down but okay
