Don't know why others said he scammed but I just gave a try and it worked for me. So I decided to quote his advice above for anyone want to use his service. Here is my test, he's not scammer but vps was delivered a bit late.

"His datacenter" doesn't make sense, more likely he resell from hostigger.com VPS server with 2TB Bandwidth / 1Gbps shared = 100-200Mbps

I bought couple of this VPS servers just for fun, pm me if you want it for free lol

you're pretty new, and yeah it's server exactly same as yours spoof one (except it's 2TB BW which he says it's unmetered), and it does spoof.

I will consider if I want to give it to guy with 1 post.

Actually my account was many years old but deleted for some unknown reason, maybe because I don't post that much.

Also I tested hosttigger openstack vps in Turkey and it does not spoof.

I actually bought some 15\$ VPS.

Hi guys.

We have our own machine on this datacenter and those hosting give us ipv4-ipv6.

If you try to spoof with those hosting u will get banned in some minutes.

With me no.

Kind regards.
