Yoo HackForums people!

Are you looking for a free money drop? Or maybe a paid service?
Dont look further!

KushModz is back!

We try to host free money drops everyday and do awesome 500m+ give-aways for those that wanna try their luck. If you want to join the community just visit our Website, there is info on how to get access to the free stuff there.

We also have a paid service where we try to serve our customers the best way possible, we have our very own recovery methods and so far nobody has ever got banned.

Even if the unfortunate event happens you will get a new account provided by our team with the amount of cash or levels you ordered.
