Start your journey in eCommerce and get a custom Shopify dropshipping store created just for you in a hot niche! Millions of dollars are being made each day from dropshipping, and that number is only going to go up. Picking a good niche and products that will sell are two of the hardest parts of starting dropshipping, which is why I began this service. Not only will I create the entire store from the ground up, but I will also help you with picking a hot niche with trending products that will sell very well.

Not meaning to shit your thread but that's not good. Also that has to be the most saturated niche if it's shipped from China. So is it shipped from China?
