I might be able to hack the Whatsapp (not 100% guaranteed) but it does work most of the time. However, I'm not going to do it for free. Also No i can't get the previous chats. The number just becomes yours.

1) Do you just need the Whatsapp number?

2) what is the price?

You'll get proof as soon as I get access to it.

You might also send them a picture to get there ip, which could possibly help u along.

I posted it somewhere on this forum some time ago, look it up.

I think you need the number because the number is the only key to the persons account

There was a zero day that came out on May 13th, but I don't think there are any public PoC's. Also, most people have updated their app and patched it by now. You probably won't have too much luck through this attack vector.

if you're dealing with anyone from this site, be sure to set up a contract with the details of the deal.

feel free to contact me if you need this done, I can potentially get into a whatsapp account, dependent on the account.
