gadjooooo - February 1, 2019, 7:10 am

thank you bro this is useful :)

Skull-13 - February 1, 2019, 7:13 am

Thanks for sharing the premium tool.

-Lunar - February 1, 2019, 7:18 am

Does the file its downloading have to be encrypted with a specific compatibility type or obfuscated a specific way for it to be FUD? Sorry if its a stupid question.

NYANxCAT - February 1, 2019, 7:24 am

(Feb 1, 2019 08:18 AM)-Lunar Wrote: [\[CITE\]](#) Does the file its downloading have to be encrypted with a specific compatibility type or obfuscated a specific way for it to be FUD? Sorry if its a stupid question.

No need, no need to crypt the files. You just need to crypt the 5kb downloader.exe.

Does it matter the compatibility type or any added things with crypter like how some have features for install/startup, critical process, those types of things. And compatibility types for injection like

vbc.exe, self injection, manual image mapping? Im just curious im trying to test

Thankyou!

I.M.P - February 1, 2019, 8:26 am

I thought you couldn't code in c#?

NYANxCAT - February 1, 2019, 8:42 am

Well if you want to use crypter then just disable install from lime downloader, it should work with any feature.

(Feb 1, 2019 09:26 AM)Atroxcity Wrote: [\[CITE\]](#) I thought you couldn't code in c#?

I code C# but I just prefer vbnet. But for now I'm trying to update all my softwares on GitHub to C# because people want C# instead of of vbnet.

Interesting okay!

Cyber86 - February 1, 2019, 10:23 am

Thanks for posting, good set of software you released.

Vuln - February 4, 2019, 4:32 am

Nice to see a downloader for a change.

Fyi, <https://github.com/NYAN-x-CAT/Lime-Downloader> still mentions that it's coded in VB.NET.

akarabread - February 5, 2019, 5:49 am

nice share bro. check it out...

naxster - February 5, 2019, 10:27 am

Do we have to upload the files on that website? Or can we upload anywhere else that has direct download? :)

I get 11/22 in spyralscanner, but after using resourcehacker + .net reactor, i get 2/22, good enough!
:D

I'm going to see if i can change anything to make it fud :)

Hmmm i dont think i can change any codes to make it FUD.... Or is it possible to make it FUD? :)

V3xD - February 6, 2019, 4:59 am

Cool of you to share, any chance you could post/send a compiled link? Was going to look at modding the stub.

jameswatt17 - February 6, 2019, 5:38 am

pls whats the purpose of this tools, can someone enlighten me plss

NYANxCAT - April 1, 2019, 1:51 am

I just reFUD

Yup only use your own xampp for testing.

I don't know any good file hosting services. Try to open a thread asking for direct hosting.

cruise0 - May 11, 2019, 9:00 am

added into collection....thanks

F11 - May 18, 2019, 2:56 am

I hate that I'm a one asking, but what does it do? I haven't messed with these kinds of tools in a long time.

Vuln - May 18, 2019, 3:23 am

(May 18, 2019 02:56 AM)F11 Wrote: [\[CITE\]](#) I hate that I'm a one asking, but what does it do? I haven't messed with these kinds of tools in a long time.

It downloads & executes .NET 4.x payloads into memory. Downloaders are generally used to reduce the payload file size.

zelus - July 12, 2019, 12:44 pm

why do i keep getting, could not load assembly?

Holuwadrizzy440 - July 13, 2019, 8:26 am

whats this?

free crypter?

bucanner - July 29, 2019, 7:12 am

pls NYAN CAT kindly show me a demonstrating video on how this work. love ur work thanks

does any body knows how to setup this loader,if you do pls tell me

Same, can someone explain to us how to use it?

Stanley - February 25, 2020, 1:12 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley

I try to test it with putty or winrar . but i get this same issue with all "https" links

Gosh

Your Vps has

https and http

Use http my freind not https for your hosted exe url link to provide to your loader/Rat

look at developers image

[img]http://prntscr.com/nn5k64[/img]

He is using http...

not http+s

This is perhaps why the problem has persist with all the rats you have tried

You must use http for your url link

Lacan - November 29, 2020, 9:09 pm

really not bad, very accurate graphics and guaranteed functionality
