Thread: [Reddit Bot 2.0 by TmxPro - fast and reliable](#)

2c3r - February 4, 2019, 12:46 pm

So I made a thread about selling upvotes but since most ppl seem to be only interested in buying the actual bot itself then I'm gonna make a thread on it too.

And i had an old version (you can find people reselling it for ridiculous prices if you search around) and it is still not patched so my algorithm seems to be solid since i made the bot in October last year.

Okay now lets get to the new one. It is still pretty fresh and im constantly improving it. It is based on old one but just has been improved all around like the algorithms itself, gui is much nicer and I myself like the code MUCH more.

Features:

- max 100 threaded account creation(technically it could easily do more but 2captcha cant keep up) from my testing I can create 100 accounts in 5-10 minutes - it depends on proxy speed though mainly.
- It uses 2captcha so currently 1000 accounts will cost you 2.99\$ to create
- Upvoting speed can be adjusted - fastest is 100 upvotes in about 3-8 minutes but that is not a smart thing to do obviously.
- It uses any kind of proxies, i just use random scrapped ones and i get under 10% of banrate on new accounts i create. And very little shadowbans.
- It upvotes post until it actually reaches the target score - so if some users are shadowbanned then it will just keep using new users until it reaches the target.
- It is a single exe with no other requirements afai.
- It is very easy to use unlike my old one. It needs no tutorial at all, everything is self explanatory.
- Proxies are tied to user until the proxy dies so user seems more like a real user since uses same IP.
- It can upvote posts AND comments. And you only have to put in the link.
- It can upvote multiple submissions at once.

Also i am constantly improving it so the list of features will grow.

PM if you are interested.

Price depends on what kind of support&updates&features you want. Thats right, i can make a custom version that suits your needs! And add requested features.

MaxiPads889 - February 5, 2019, 4:22 am

Send me some further contact info with some screenshots of the program

mikehopkins - February 22, 2019, 10:56 am

Hey there, could you PM me or share contact info on more details on this bot?

redditupvotes - February 22, 2019, 3:11 pm

Please pm me your contact info as well. Im interested. I can't pm yet.
