So, if I summarize, you are selling a crypter not FUD at scantime (and i don't talk about runtime). It's rather innovative.
GLWS ?

Your scan image is broken. Please fix it.

You shouldn't scan on spyralscan, instead of use antiscan.me or purchase an API for scanmybin.net and embed scanner on your crypter ?
What is the language of your stub ?

GLWS ?

GTFO you piece of shit!
21 fucking days of UD considering you just started selling this SHIT two days ago.
You had 21 days UD while nobody except you two was using it!!!!
STUPID FUCKER!!!!!!

I am not sale trashing your thread.
Far away from my intention.
I simply reacted to what you said.
Where in the thread have you mentioned you are selling on other forums?, because I didn't see it!

Are you sure?... 21 days? Maybe because you only have it privately and you didn't use it on any other pc with av installed.

Agreed, 21 days is only possible for a private stub or a stub thats got a small user base and is very disciplined....

SIM-3132187 - February 8, 2019, 3:04 am

21 day lmao, scan a file on scanmybin, then scan the same file on VirusTotal. Wait 1-2 day and rescan the file on ScanMyBin. We will se if you are 21 day UD.
PS : you use controleFlow and random word in the file Info so, you don't care about scan a file on Vt right ?

Why would i even mention that, hf is completly other marketplace

Because you mentioned UD time 21 days, therefore if the user doesn't know you are selling on other marketplace then it means you are trying to promote your product based on a lie, therefore you are trying to scam.
