Thread: [Web Proxy Browser | Fast | No Logs | Free](#)

ethminer - February 6, 2019, 10:51 pm

<https://free-proxy-lists.com/proxy-browser.php>

WHAT IS A WEB PROXY BROWSER?

A proxy browser is a web service that allows you to connect to websites anonymously directly within your browser.

IS THIS SERVICE FREE?

Yes our proxy browser is completely free to use - although we may place ads on occasion depending on the content.

HOW FAST IS A PROXY BROWSER?

Our web proxy operates on multiple 1Gb/s servers with unlimited bandwidth to ensure you always have the maximum for performance.

IS THIS PROXY BROWSER ANONYMOUS?

Yes our proxy browser is completely anonymous, and has multiple security features that allow you to tune the privacy even further.

DO YOU STORE LOGS?

Sadly we do not store any logs for performance reasons. There would be too many for us to handle so we can not.

HOW DO I REPORT BAD USE?

Sadly we do not have any logs for performance reasons so there is nothing we can do if someone has misused this service. We recommend using BitMitigate to secure your website.
