Thread: [Sonex / 411005 / Do Not Buy From user](#)

Time Wizard - February 7, 2019, 1:51 am

So let's start off by saying that he seemed like a nice guy etc... But with that being said who are we kidding here this guy is nothing but a greedy Fu*& that tried to make money off a method that he advertised will make money and this and that I done exactly what the ebook stated followed to a t and even more

He has now blocked me ...

Here is profile to users page :

<https://hackforums.net/member.php?action=profile&uid=411005>

item I'm referring to would be :

<https://hackforums.net/showthread.php?tid=5933455>

Said he said give it 3 days and we would definitely be making money I have yet to see anything at all from his method so I reached out after spending \$30 in Facebook ads and seen he closed his thread stating he had another method and he would send out to the ppl that have paid for the current method. So after asking for suggestions and bringing up that fact that the method isn't working as he advertised he stopped responding too me so I went out and started asking others that had paid for this.shit as well And all of the results are the same method doesn't work etc.... I see him online I message him he said he would get the other niche sent over (so at this point he know ls his method he has sold to use isn't working as advertised) after this point never hear back from him so wait a day and see him online no reply wait and ever.time since he will just got offline right after I message him ... And I have added some photos below of our chats

This includes everything

<https://imgur.com/gallery/OBIP5Cf>

ot to even start with the others that paid that may add in there own 2 cents sorry sonex I tried to be patient and nice ...

This is community alert of the experience with this user I know it wasn't under contract so wanted the community too know of my experience anyways

Also seems I'm not the first

I believe sharing private messages is against the rules, unless it's a deal dispute.

I have seen the method in question and I don't know how you failed to make money from it if you applied yourself just a little and put some real work in. Sonex knows what he's talking about and doesn't expect his buyers to expect his methods to be money on a silver platter.

I went above and beyond I applied myself and my \$ he stated we would see something within 3 days didn't see anything at all and all of a sudden he stopped selling Not the only person that the method isn't working for as it was advertised to work or I would have thought it was just me not doing it right etc... But it's everyone he sold to that has messaged me.back @ 6 ppl so far

Would be glad to show proof of my full effort and going by his ebook instructions to the fullest even went beyond the ebook after the stuff wasn't working and even asked for suggestions and he stopped replying after I told him it was working out

I'm actually glad this has finally gone public because I was well aware of the "group" of people OP tried to gang up against me. I know who you are because customers I've helped appreciated it thus they forwarded me your group messages indicating your usernames. I am NOT interested in your progress thus far, to be frank I don't give a fuck. The moment you decided to back up OP for his lack of brain usage you breached my contract and my Terms of Service you agreed on. I do not usually go after "terms" per-se and I'm quite flexible to work with but the fact your main goal was to create a group of people to harm my status on HF with your fake screenshots just goes to prove people would go above and beyond to get it done.

As to why you didn't get replied to instantly is because you opted in for Basic package, you are not priority thus you are not entitled to full support otherwise there is no point of people paying more for support. I will not make them less important just because you thought you can threaten me. I'm not buying in on threats, actually I enjoy receiving them from you in particular because that just goes to prove your ignorance.

- When I asked for your progress (after I got info of your "group") you clearly ignored my question and since then you are being ignored as per our agreement.

On top of it, I'm not buying your story of spending more than 15\$ on ads. Instructions were to run the ad for 3 days = 15\$, if you don't get results contact me back and wait for reply. For instance you can't even follow such a basic prevention measure since I can not guarantee everyone will get same results thus additional work from my side is required in case you fail. You were too ignorant and

impatient and your only goal was this thread since you got nothing else on you.

To close this down, I will not reply to this thread other than what you just read. 5-6 Customers who blindly followed your lead can have a 2nd chance with me as of this post, I will remove them from my ignore list but you're staying on it and as far as I'm concerned you can keep crying for as much as you'd like. I apologized for 2 days delay I had but that was mainly because I had 7 scheduled meetings with Full support customers who are absolutely entitled to full support they have received, and are still receiving it to this day.

- If you post in this thread backing this false claims be prepared to be on ignore list, this is not a threat if you believe what OP done is right, you are absolutely entitled to it but please dont come back begging me for shit. I need to draw a line somewhere, else this will turn nasty.

Overall nice try buddy, not sure what do you wanted me to? Cry and beg you to stop threatening me? Not gonna happen. Fuck off.

ToS ;

You understand you cant expect 24/7 support unless you purchased Full Package, same applies to Mentoring Sessions/Personal Set-Up.

You agree not to behave like a redneck, single insult or a threat towards me as a seller will result in termination of our contract. No refund, support or further communication will occur in such event. No exceptions.

Best of luck resolving this. Shopify is not as easy as making a store and spending \$20-\$50 on ads, regardless of how it's advertised. It required testing and putting in some work. ?

The method in question is far from just setting up a store and throwing money at it though.

I messaged you once a day even when you were clearly online with no reply and here let me just get a screen cap of the ads invoices and stuff and add up here.

why you always so mean to your OWN customers. i see other DD / Alerts and you get triggered wayyy to easy. he asked for help and you said go read the book. lol

great support...

Classic E-Book buying proces, can never get enough of this shit on HF.

Just don't buy E-Books anymore, lesson learned.

Sibil - February 7, 2019, 2:47 am

Yeah, same thing happened to me.

I bought the method, I spent 75\$ in ads following exact steps described in book, with no success. No sale.

The method is worthless and will never work. Well, the niche works, but definitely not how was described in the method.

You will get NO SALES if you apply what was written in the ebook.

Buy a support package then? I mean do I force you not to buy it? You're cheap? Be cheap and be silent please. Not much I'm going to do about it, I gave people 2 options, pick wisely dont be a bitch later on :)

I'm out. Have fun.

11.) What's the difference between two packages?

Basic package gives you(basic support), if I have a Full Package customer needing my assistance you will be put on hold. Full Package customers can ask for Personal Set-Up either done on my PC then handed over, or done through TeamViewer.

You haven't even given basic support too any of us lol

Riddick - February 7, 2019, 3:03 am

I PM'd Sonex too. The thing is, the info he sells was very useful to me because I always wanted to get into Shopify. I am struggling to get the particular niche in the method to work, but I am going to keep grinding until I get something that works for me. I bought the basic package, but he responded to my PM asking me to show him what I've done so far, which I suppose he didn't have to.

Cyam - February 7, 2019, 3:05 am

I purchased full package and I can confirm I'm still receiving support on daily basis. You just had to be patient, he's a busy man. I had results on 2nd day but he set me up since I payed extra for it.

The Avengers - February 7, 2019, 3:47 am

Hmmm, I kinda find it odd how you asked people about the method & just posted PM's without notifying people of such or rather or not they wanted to be a part of it. I'm not trying to bash Sonex's method because I do believe that his method could potentially work & I've talked to others that say it does work. If I would've known my Private Message would've been posted publicly I would've included context. Sonex has had no problems communicating with me this far just the past few days I've assumed he has been busy but when he has talked to me he has helped me with my problems & he even told me he would set stuff up for me since he wasn't sure what was wrong either.

TLDR; Ask people/warn people prior to just posting PMs. It looks bad. Sonex's method should work & he has offered to help, you just don't get priority support.

Without even reading this whole thread yet, I already know what it likely sums up to. Another person scammed by sonex and his bs money making methods, and when you ask for help or a refund, he'll just ignore you.. so you keep msging him because hey, you've spent your hard earned money on

the product.. promised the world, and once he gets your money in his hands, hes out like a thief in the night. Forget about ever getting a refund despite him having the whole "money back guarantee-if you dont make your money back you're getting your money back no questions asked" bs. Then he'll play the victim, and make it seem like you're threatening him was coming at his head out of nowhere. Same story, it's been going on for years. Hes scammed more users out of their money with his bs money making ebook then anyone on this forum. That's all hes known for! Even a Google search shows you people talking about him pulling the same exact scenerio. Not even sure why hf allows him to continue to scam people with the same bs ebook, hundreds of people can't all be lying. The money he shows in his proofs are not from what he sells in any of his ebooks, and his PayPal balance is nothing but the money hes made from people buying his bs ebook. It's a good new member trap. He has no credibility, no pride and is the worst of the worst. He got me the same way about a year ago.. all that does is make people not trust spending money on the forum, that's why I dont know why they allow him to keep doing that shit. But it's all about business, he gives the forum money to continue his on going scam.. it's no secret. You'll never see your money back or anything intelligent coming from him OP, might just have to cut your losses. Dont worry, karma is going to catch up go Antonio...

I gave him proof (Screen shot etc etc). So i asked for support to setup the method any different way or refund my money. But he just completely ignored me. he made a good reputation in this forum(By Vouch from Buddys)and by using this reputation he is selling shitty method or scamming people like us.His main income source is hf. And when i get scammed there was no contract policy. One more thing he has lots of buddy in this forum(they helped him for getting good rep). Its like Let's vouch for each other lmao. So whenever someone make a legal complain Against him they came and support him.(you find some of them in this post) and thats y he always gets away from ban. But i know if he continually doing this sooner or later he will get ban. Anyways i dont care about him get banned or not. I care about my money. Yeah, you can pretty much see the whole scope of his scam. He has his friends who also sell scam bucks, and they all just vouch for each other and come to each others rescue.. to fool new members. But its pretty obvious when there are literally 100's of people saying the same thing. If it was just a handful of people complaining, then ok.. maybe they're wrong.. but this scam has gone on for years. You can even Google "sonex scam" and what do you know, people are even talking about his ebook scam on multiple other websites. So the whole trying to play the innocent victim like he does is long played out. He's a coward. Some people are that greedy, that they don't even care how many people they screw over as long as they can get over.. they will. As I mentioned before, he gives the forum a bad name and just turns away alot of users instead of making them spread the word. It's one thing, if he didn't have his whole money back guarantee.. then I wouldn't even say nothing, because it would be at your own risk.. but he cons people into this "100% money back guarantee, if you don't make your money back.. nothing to worry about" bs.. and doesn't even honor it. But you know what, it is what it is.. he'll never return your money bro, so you might as well just count it as a loss. Staff wont do anything, because he greases their palms with donations and paying to have his ebook listed at the top when he wants. It's a never winning battle. Just take it as a lesson, and don't spend any more money on this forum. You live and you learn. I used it as motivation to go out and figure out how to make money with cpa.. so all in all, it worked out.. but not from anything I learned from that prick.

keepingitrealistic - September 3, 2019, 2:54 pm

I have purchased the Shopify method from Sonex and spent \$ in ads, he tried to help with the campaign but nothing worked at the end. However, I lost focus and didn't even try to get the money back only because of respect for him - we had a nice chat and he seemed like a very cool dude who would carefully explain stuff, take the time for details etc.

This time I decided to buy his other method (\$100 full support package) that includes making money from a network through fb ads as well with a 'trick' included. Not optimistic about this but just wanted to give it a try. That network's support is catastrophically lazy and they fixed a minor issue only after 3 full days.

Also just read Sonex's bio box that he had an accident but luckily for him nothing too serious. Hope he gets back on track and that we can get this thing working in the meantime.

I'll report here just in case with an honest review.

Shone - September 5, 2019, 10:06 am

Bought one of his methods too, didn't work. He kept trying to support me but was a pretty bad method designed in a way it works on paper but not really in theory.

keepingitrealistic - December 19, 2019, 1:58 pm

Purchased 2 methods from him, the first I thought I was late to the party (although shouldn't have been as he swore it would work) so didn't ask for a refund, for the other one I asked for a refund but never received it after many excuses in Skype.

Now he seems to either work with or be the same person under another nickname:

<https://hackforums.net/member.php?action=profile&uid=483814>

Safe to say he's either a scammer or doing a very shitty job at selling these non-working methods and not providing any support.

Thanks for notifying us, looks like he's been in-active for soon to be 2 months.

Scammers are often suffering from some issue, when it comes to money, in real-life as well. :(Sad.
