I am trying my hardest to make a logo for my Shopify but no matter what I do, it looks crap. Any chance one of you kind folks could throw me some rope?

Size: large and square lol

Colour Scheme: Spider must be silver

Render/Image: None, just a cool spider with cross rifles behind it or use your imagination ?

Text: Silver Spider Hunting

Anything else: Silver spider <3

Hey I just did a simple concept.

Took like 20 mins, really isn't crazy but I just wanted to have a go.

I can't post links so here's an Imgur link with spaces in it.
